12 Q. Let's take -- for example, you identified
13 looking at the -- the website as one thing that -- that
14 you looked at to determine whether or not the software
15 was counterfeit. What about the website -- strike that.

16 What in the website would you look for to
17 determine whether the -- the software was counterfeit?

18 MR. STERN: When you say "you," you mean
19 Google?

20 MR. SHEK: Right. Google.

Q. That's not just standard practice within Google; that's standard practice, period?

A. Standard -- it should be standard investigative practice from any investigator in any capacity investigating a website.

Q. That was true at the time you were a senior risk investigator at Google?

A. Yes.

Q. Is that true today?

A. Yes.

Q. Walk me through these different -- these different things you listed. First you mentioned price point. What about the price point would Google -- or did Google look for to determine whether the software was counterfeit?
