INTRODUCTION1

BACKGROUND2

ARGUMENT6

 I. THE MINIMUM COVERAGE PROVISION IS A PROPER EXERCISE
 OF CONGRESS’S CONSTITUTIONAL AUTHORITY TO REGULATE
 INTERSTATE COMMERCE7

 A. The Minimum Coverage Provision Regulates Payment for
 Health Care Services, a Class of Economic Activity That
 Substantially Affects Interstate Commerce7

 1. The minimum coverage provision regulates
 the practice of obtaining health care without
 insurance, a practice that shifts health care costs
 to other participants in the health care market9

 2. The minimum coverage provision is essential to
 the Act’s guaranteed issue and community rating
 insurance reforms 13

 B. The Minimum Coverage Provision Is a Necessary and Proper
 Means of Regulating Interstate Commerce 17

 1. Courts accord broad deference to the means adopted by
 Congress to advance legitimate regulatory goals 17

 2. The minimum coverage requirement is plainly adapted
 to the unique conditions of the market for health care
 services 19

 3. Congress can regulate participants in the national health
 care market, even if they do not currently maintain
 insurance coverage 22

24
25
26
27
28

4. Congress’s rational basis for enacting the Affordable Care Act does not depend upon attenuated links to interstate commerce..... 27

II. CONGRESS ENACTED THE MINIMUM COVERAGE PROVISION PURSUANT TO ITS INDEPENDENT POWER UNER THE GENERAL WELFARE CLAUSE 30

III. THE AFFORDABLE CARE ACT DOES NOT UNCONSTITUTIONALLY DELEGATE LEGISLATIVE POWER TO THE INDEPENDENT PAYMENT ADVISORY BOARD (IPAB)..... 36

IV. THE MINIMUM COVERAGE PROVISION AND THE PROVISIONS CREATING THE IPAB ARE SEVERABLE FROM THE ACA’S REMAINING PROVISIONS 37

INTRODUCTION

1
2 Plaintiffs—an individual, a doctor who alleges he participates in the Medicare
3 program, and two United States Representatives—seek to invalidate the Patient
4 Protection and Affordable Care Act (“ACA” or “Act”). They claim that the minimum
5 coverage provision of the ACA—which requires all non-exempt Americans to maintain a
6 minimum level of health insurance or pay a penalty—exceeds Congress’s Commerce
7 Clause authority. And they contend that the Independent Payment Advisory Board
8 (“IPAB”)—which is tasked with finding ways to reduce Medicare costs—is also
9
10 unconstitutional. Plaintiffs are wrong on both accounts.
11

12 As an initial matter, plaintiffs lack standing to raise their claims.¹ And plaintiffs’
13 arguments as to the Act’s alleged unconstitutionality fail as a matter of law. As the Sixth
14 Circuit recently concluded, the minimum coverage provision, which regulates the timing
15 and method of payment for health care services, falls well within Congress’s Commerce
16
17

18 ¹ Under Local Rule 7.1(d)(2), defendants incorporate by reference the background,
19 standing, and merits arguments addressing plaintiffs’ IPAB, substantive due process,
20 personal medical autonomy, and preemption claims contained in their response to
21 plaintiffs’ motion for preliminary injunction, *see* Defs.’ Resp. Pls.’ Mot. Prelim. Inj. at 2-
22 20 ECF No. 27, and defendants’ motion to dismiss and reply in support of that motion,
23 *see* Defs.’ Mot. Dismiss at 5-54 ECF No. 42; Defs.’ Reply at 2-6, 23-30 ECF No. 59.
24 The government’s position is that every count of the complaint is subject to dismissal on
25 its face for lack of jurisdiction. If this Court concludes that the complaint alleges facts
26 sufficient to support standing, however, defendants respectfully request that the Court
27 “defer considering the” motions for summary judgment or “allow time . . . to take
28 discovery.” Fed. R. Civ. P. 56(d)(1), (2).

In addition to moving for summary judgment on Counts I, II, III, and VII of the
Second Amended Complaint, defendants move for summary judgment on plaintiffs’
remaining claims -- Count IV (personal medical autonomy), Count V (substantive due
process), and Count VIII (alternative preemption). Plaintiffs voluntarily dismissed Count
VI of their Second Amended Complaint, *see* Pls.’ Mem. at 1, ECF No. 51.

1 Clause power. *See Thomas More Law Center v. Obama*, ___ F.3d ___ (6th Cir. June 29,
2 2011), 2011 WL 2556039. Indeed, to uphold the provision, the Court need not make new
3 law or alter the established allocation of authority between state and federal government;
4 it need only apply longstanding principles recognizing congressional authority to regulate
5 economic conduct that substantially affects interstate commerce.
6

7 Plaintiffs' claim that the IPAB violates the non-delegation doctrine is equally
8 without merit given the detailed statutory requirements concerning its operation. The
9 Supreme Court has upheld far broader delegations couched in far more subjective terms.
10 Plaintiffs' other attempts to overturn the ACA—their substantive due process, personal
11 medical autonomy, and preemption claims—are unavailing for the reasons set forth in
12 defendants' prior briefing, *see* Mot. to Dismiss at 41-45, 53-54, ECF No. 42; *see also*
13 Reply Mem. in Supp. of Mot. to Dismiss at 23-26, ECF No. 59.
14
15

16 Plaintiffs may dispute the policy judgments that Congress made in enacting the
17 Affordable Care Act. But those judgments are reserved to the legislators elected to make
18 them. In our democratic system, there is a strong presumption that those judgments are
19 constitutional. Plaintiffs do not and cannot overcome that presumption. The government
20 is therefore entitled to summary judgment.
21
22

23 **BACKGROUND**

24 The Affordable Care Act is a comprehensive reform of our national health care
25 system. The Act seeks to ameliorate the crisis in the interstate market for health care
26 services that accounts for more than 17% of the nation's gross domestic product. SMF ¶
27
28

1 1. Millions of people without health insurance consume many billions of dollars worth of
2 health care services each year. *Id.* ¶ 12. They fail to pay the full cost of those services
3 and shift the uncompensated costs of their care—totaling \$43 billion in 2008—to health
4 care providers regularly engaged in interstate commerce. *Id.* ¶ 21. Providers pass on
5 much of this cost to insurance companies, which also operate interstate. *Id.* ¶ 23. The
6 result is higher premiums that, in turn, make insurance unaffordable to even more people.
7
8 *Id.* At the same time, insurers use restrictive underwriting practices to deny coverage or
9 charge higher premiums to millions because they have pre-existing medical conditions.
10
11 *Id.* ¶ 16. The Affordable Care Act addresses these national problems through measures
12 designed to make affordable health care coverage widely available, protect consumers
13 from restrictive underwriting practices, and reduce the uncompensated care that is
14 obtained by the uninsured and paid for by other participants in the health care market.
15

16 First, the Act builds upon the existing nationwide system of employer-based health
17 insurance, the principal private mechanism for health care financing. Congress
18 established tax incentives for small businesses to purchase health insurance for their
19 employees. 26 U.S.C. § 45R. It also prescribed tax penalties for large employers if the
20 employer does not offer full-time employees adequate coverage and at least one full-time
21 employee receives a tax credit to assist with the purchase of coverage in a health
22 insurance exchange established under the Act. *Id.* § 4980H.
23
24

25 Second, the Act provides for the creation of health insurance exchanges to allow
26 individuals, families, and small businesses to use their collective buying power to obtain
27
28

1 prices competitive with those of large-employer group plans. 42 U.S.C. § 18031.

2 Third, for individuals and families with household income between 133% and
3 400% of the federal poverty line who purchase health insurance through an exchange,
4 Congress offered federal tax credits to defray the cost of premiums. 26 U.S.C. § 36B(a),
5 (b). Congress also authorized federal payments to help cover out-of-pocket expenses
6 such as co-payments or deductibles for eligible individuals who purchase coverage
7 through an exchange. 42 U.S.C. § 18071. In addition, Congress expanded eligibility for
8 Medicaid to cover individuals with income up to 133% of the federal poverty line. *Id.* §
9 1396a(a)(10)(A)(i)(VIII).
10
11

12 Fourth, the Act regulates insurers to prohibit industry practices that have prevented
13 people from obtaining and maintaining health insurance. The Act bars insurers from
14 refusing coverage because of pre-existing medical conditions, canceling insurance absent
15 fraud or intentional misrepresentation of material fact, charging higher premiums based
16 on a person's medical history, and placing lifetime dollar caps on benefits. *Id.* §§ 300gg,
17 300gg-1(a), 300gg-3(a), 300gg-4(a), 300gg-11, 300gg-12.
18
19

20 Fifth, the minimum coverage provision at issue here will require, beginning in
21 2014, that non-exempted individuals maintain a minimum level of health insurance or
22 pay a tax penalty. 26 U.S.C. § 5000A. The requirement may be satisfied through
23 enrollment in an eligible employer-sponsored plan; an individual market plan, including
24 one offered through a health insurance exchange; a grandfathered plan; government-
25 sponsored programs such as Medicare, Medicaid, or TRICARE; or similar coverage as
26
27
28

1 recognized by the Secretary of Health and Human Services (“HHS”) in coordination with
2 the Treasury Secretary. *Id.* § 5000A(f)(1). Congress exempted certain groups, *id.* §
3 5000A(d), and made the tax penalty inapplicable to individuals whose household income
4 is too low to require them to file a federal income tax return, whose premium payments
5 would exceed 8% of household income, or who establish (under standards set by the
6 HHS Secretary) that they have suffered a hardship with respect to the capacity to obtain
7 coverage. *Id.* § 5000A(e).
8
9

10 In enacting the minimum coverage provision, Congress made detailed findings
11 that establish the foundation for the exercise of its commerce power. Congress found that
12 the minimum coverage provision “regulates activity that is commercial and economic in
13 nature”—how people pay for services in the interstate health care market. 42 U.S.C. §
14 18091(a)(2)(A). Congress found that, as a class, people who “forego health insurance
15 coverage and attempt to self-insure” fail to pay for the medical services that they
16 consume, and shift substantial costs to providers and insured consumers, raising average
17 family premiums by more than \$1,000 a year. *Id.* § 18091(a)(2)(A), (F). In addition,
18 Congress found that the minimum coverage requirement is “essential” to the Act’s
19 guaranteed issue and community rating reforms that will prevent insurers from relying on
20 medical condition or history to deny coverage or set premiums. *Id.* § 18091(a)(2)(I).
21 Congress found that, without the minimum coverage requirement, many people would
22 exploit these new consumer protections by waiting to purchase health insurance until they
23 needed care, which would undermine the effective functioning of insurance markets. *Id.*
24
25
26
27
28

1 The ACA also establishes an Independent Payment Advisory Board. Composed
2 of fifteen members appointed by the President and confirmed by the Senate, the Board
3 will be responsible for finding ways to “reduce the per capita rate of growth in Medicare
4 spending[.]” 42 U.S.C. § 1395kkk(b). The Secretary of Health and Human Services will
5 be required to implement the Board’s recommendations on a yearly basis unless Congress
6 passes legislation to supersede the Board’s proposals. See 42 U.S.C. § 1395kkk(e)(3)(A).

8 ARGUMENT

9
10 A court should grant summary judgment where “there is no genuine dispute as to
11 any material fact and the movant is entitled to judgment as a matter of law.” Fed. R. Civ.
12 P. 56(a); see *Szajer v. City of Los Angeles*, 632 F.3d 607, 610 (9th Cir. 2011). This case
13 presents pure questions of law—primarily, whether Congress acted within its Article I
14 powers in enacting the Affordable Care Act’s minimum coverage provision and the
15 IPAB-related provisions. Congressional acts are entitled to a “presumption of
16 constitutionality,” and will be invalidated only upon a “plain showing that Congress has
17 exceeded its constitutional bounds.” *United States v. Morrison*, 529 U.S. 598, 607
18 (2000). This presumption is “not a mere polite gesture” but reflects the substantial
19 deference that a court owes the “deliberate judgment by constitutional majorities of the
20 two Houses of Congress that an Act is within their delegated power.” *United States v.*
21 *Five Gambling Devices*, 346 U.S. 441, 449 (1953).

22
23 Moreover, plaintiffs bring a facial challenge to the minimum coverage provision.
24 To prevail, plaintiffs must establish that “no set of circumstances exists” under which
25
26
27
28

1 the provision would be valid, “‘*i.e.*, that the law is unconstitutional in all of its
2 applications.’” *Wash. State Grange v. Wash. State Republican Party*, 552 U.S. 442, 449
3 (2008) (internal citation and quotation marks omitted). Unless plaintiffs can meet this
4 heavy burden, defendants are entitled to summary judgment.
5

6 **I. THE MINIMUM COVERAGE PROVISION IS A PROPER EXERCISE**
7 **OF CONGRESS’S CONSTITUTIONAL AUTHORITY TO REGULATE**
8 **INTERSTATE COMMERCE**

9 **A. The Minimum Coverage Provision Regulates Payment for Health Care**
10 **Services, a Class of Economic Activity That Substantially Affects**
11 **Interstate Commerce**

12 The Constitution grants Congress the power to “regulate Commerce . . . among the
13 several States,” U.S. CONST. art. I, § 8, cl. 3, and to “make all Laws which shall be
14 necessary and proper” to the execution of that power, *id.* cl. 18. This grant of authority
15 allows Congress not only to regulate the channels and instrumentalities of interstate
16 commerce, but also to address other conduct that “substantially affect[s] interstate
17 commerce.” *Gonzales v. Raich*, 545 U.S. 1, 16-17 (2005). In assessing those substantial
18 effects, Congress’s focus is necessarily on the aggregate impact of a particular class of
19 conduct. Congress need not predict whether and to what extent a particular individual in
20 the class will contribute to that aggregate effect. *Id.* at 22; *Wickard v. Filburn*, 317 U.S.
21 111, 127-28 (1942); *see also United States v. Serang*, 156 F.3d 910, 913 (9th Cir. 1998).
22
23
24

25 A Court’s task in reviewing the validity of legislation enacted under the commerce
26 power “is a modest one.” *Raich*, 545 U.S. at 22. The Court “need not determine”
27 whether the regulated activities, “taken in the aggregate, substantially affect interstate
28

1 commerce in fact, but only whether a ‘rational basis’ exists for so concluding.” *Id.* This
2 deferential standard reflects both Congress’s superior capacity to make empirical
3 judgments and operational choices and the appropriate structural separation between the
4 judicial and legislative powers. The courts owe “Congress’ findings deference in part
5 because the institution is far better equipped than the judiciary to amass and evaluate the
6 vast amounts of data bearing upon legislative questions.” *Turner Broad. Sys., Inc. v.*
7 *FCC*, 520 U.S. 180, 195 (1997) (internal quotation omitted). “This is not the sum of the
8 matter, however.” *Id.* The courts “owe Congress’ findings an additional measure of
9 deference out of respect for its authority to exercise the legislative power,” lest a court
10 “infringe on traditional legislative authority to make predictive judgments when enacting
11 nationwide regulatory policy.” *Id.* Accordingly, in the context of a Commerce Clause
12 challenge, this Court’s task is to conduct a “narrow” inquiry into whether Congress had a
13 “‘rational basis’” for concluding that the activity it was regulating affects interstate
14 commerce. *State of Nevada v. Skinner*, 884 F.2d 445, 450 (9th Cir. 1989).

15 The record supports Congress’s express findings that the minimum coverage
16 provision “regulates activity that is commercial and economic in nature,” 42 U.S.C.
17 § 18091(a)(2)(A), and has an enormous impact on interstate commerce. First, the
18 provision addresses the consumption of health care services without paying for them, an
19 activity that shifts billions of dollars of costs annually to other participants in the
20 interstate health care market. 42 U.S.C. § 18091(a)(2)(F). These shifted expenses spread
21 across state lines because many insurance companies operate in multiple states. 42
22
23
24
25
26
27
28

1 U.S.C. § 18091(a)(2)(B); *see* SMF ¶ 28. Second, the provision is instrumental to the
2 ACA’s guaranteed issue and community rating reforms that take effect in 2014. These
3 reforms guarantee that individuals will not be denied insurance because of illness or
4 accident, and will not have to pay higher premiums based on their health or medical
5 history. 42 U.S.C. § 18091(a)(2)(I), (J); *see* SMF ¶¶ 37-43.
6

7 **1. The minimum coverage provision regulates the practice of**
8 **obtaining health care without insurance, a practice that shifts**
9 **health care costs to other participants in the health care market**

10 Without question, the market for health care services is an interstate market. *See*
11 SMF ¶¶ 1, 3, 19-29, 37, 43. “[H]ealth-related spending amounted to 17.6% of the
12 national economy, or \$2.5 trillion, in 2009. . . . Virtually all of this market affects
13 interstate commerce, and many aspects of it---medical supplies, drugs, and equipment---
14 are directly linked to interstate commerce.” *Thomas More Law Ctr. v. Obama*, No. 10-
15 2388, 2011 WL 2556039, at *24 (6th Cir. June 29, 2011) (Sutton, J.), *petition for cert.*
16 *filed*, (U.S. July 26, 2011) (No. 11-117); *see* SMF ¶¶ 1, 28. Moreover, “[t]he medical
17 insurance market is large . . . and is inextricably linked to interstate commerce.” *Thomas*
18 *More Law Ctr.*, 2011 WL 2556039, at *24 (Sutton, J.).
19
20

21
22 There is also no doubt that Americans, whether or not they have health insurance,
23 visit doctors and seek medical treatment. *See* SMF ¶¶ 3-4, 7, 12-15, 19. Indeed, “[f]ew
24 people escape the need to obtain health care at some point in their lives, and most need it
25 regularly.” *Thomas More*, 2011 WL 2556039, at *24 (Sutton, J.). Because health care is
26 so expensive that most uninsured individuals cannot afford to pay for all the care they
27
28

1 receive, however, the uninsured, as a class, do not bear the full cost of their participation
2 in the health care market, instead passing significant costs on to others. SMF ¶¶ 12-15,
3 19-24, 28. Congress’s express statutory findings quantify the effect of this cost-shifting
4 on interstate commerce: The uninsured received \$43 billion in medical care that they did
5 not pay for in 2008 alone. 42 U.S.C. § 18091(a)(2)(F); *see* SMF ¶ 21. Congress’s
6 findings also describe how this activity affects the interstate health care market; the costs
7 of care that the uninsured receive are passed from providers “to private insurers, which
8 pass on the cost to families” in a direct way, by inflating their insurance premiums “by on
9 average over \$1,000 a year.” *Id.*; *see also* FAMILIES USA, HIDDEN HEALTH TAX, at 2, 6.
10 *See Mead v. Holder*, 766 F. Supp. 2d 16, 34 n.10 (D.D.C. 2011), *appeal pending*, No. 11-
11 5047 (D.C. Cir.) (“In short, those who choose not to purchase health insurance will
12 ultimately get a ‘free ride’ on the backs of those Americans who have made responsible
13 choices to provide for the illness we all must face at some point in our lives.”); *see also*
14 SMF ¶¶ 19-24, 27.

15 “The minimum coverage provision regulates activity that is decidedly economic.”
16 *Thomas More*, 2011 WL 2556039, at *11 (Martin, J.). “By requiring individuals to
17 maintain a certain level of coverage, the minimum coverage provision regulates the
18 financing of health care services, and specifically the practice of self-insuring for the cost
19 of care.” *Id.* “The activity of foregoing health insurance and attempting to cover the cost
20 of health care needs by self-insuring is no less economic than the activity of purchasing
21 an insurance plan.” *Id.*

1 To be sure, not every uninsured person will shift health care costs to others in any
2 given year. But millions will do so each year, and the cumulative impact of such cost-
3 shifting is to impose a multi-billion dollar annual burden on interstate commerce. *See*
4 *Thomas More*, 2011 WL 2556039, at *12 (Martin, J.) (observing that “[t]he uninsured
5 cannot avoid the need for health care, and [] consume over \$100 billion in health care
6 services annually”); *see also* SMF ¶¶ 19-24. Supreme Court precedent makes clear that
7 the validity of a regulation under the Commerce Clause does not turn on a specific
8 person’s actual conduct or circumstance. Nor does Congress have to wait until an
9 individual engages in particular conduct and then try to deal with the consequences.
10 Rather, Congress can exercise its commerce power to address the aggregate effect of a
11 class of conduct, taking into account the “likelihood” that a particular activity will impact
12 the relevant interstate market, given the way that the particular market operates. *Raich*,
13 545 U.S. at 19. In that way, Congress has authority to prevent an individual from
14 contributing to the consequences that it has, in its legislative judgment, predicted might
15 occur absent regulation. *See Turner Broad. Sys., Inc.*, 520 U.S. at 195 (“[C]ourts must
16 accord substantial deference to the predictive judgments of Congress.”).

17
18
19
20
21 Thus, in *Wickard* and *Raich*, the Court did not examine whether any particular
22 plaintiff’s consumption of home-grown wheat or home-grown marijuana, respectively,
23 had any impact at all on the interstate markets for those commodities; the important
24 point, in *Wickard*, was that “rising market prices *could* draw [home-grown] wheat into
25 the interstate market, resulting in lower market prices.” *Raich*, 545 U.S. at 19 (emphasis
26
27
28

1 added) (citing *Wickard*, 317 U.S. at 128). The parallel concern in *Raich* was “the
2 *likelihood* that the high demand in the interstate market will draw [home-grown]
3 marijuana into that market.” *Id.* (emphasis added). In both cases, the Court recognized
4 that these market probabilities could rationally lead Congress to conclude that the
5 conduct at issue, “when viewed in the aggregate,” would, if left unregulated, have a
6 substantial impact on the interstate markets. *Id.* at 19.
7

8 Congress therefore need not predict, person-by-person, who among the uninsured
9 will receive medical services and fail to pay in a given year. As a class, people who
10 forego insurance and attempt to “self-insure” pose a threat to the interstate health care
11 services market. *See Thomas More*, 2011 WL 2556039, at *31 (Sutton, J.) (explaining
12 that “Congress generally has broad authority under the commerce power to choose the
13 class of people it wishes to regulate, *see Raich*, 545 U.S. at 26-27, permitting it to group
14 all of the self-insured together, whether they have many assets available for medical care,
15 very few, or something in between, particularly since the financial wherewithal of the
16 self-insured is unlikely to stay put”); *see also* SMF ¶¶ 19-24, 36. The Supreme Court has
17 repeatedly held that where “Congress decides that the ‘total incidence’ of a practice,”—
18 here, the practice of attempting to pay for health care without insurance—“poses a threat
19 to a national market, it may regulate the entire class.” *Raich*, 545 U.S. at 17 (quoting
20 *Perez v. United States*, 402 U.S. 146, 154-55 (1971)).
21
22
23
24
25
26
27
28

1 **2. The minimum coverage provision is essential to the Act’s**
2 **guaranteed issue and community rating insurance reforms**

3 The minimum coverage provision is also valid Commerce Clause legislation
4 because it “is an essential part of a broader economic regulatory scheme,” which requires
5 that insurers extend coverage and set premiums without regard to pre-existing medical
6 conditions or medical history. *Thomas More*, 2011 WL 2556039, at *12 (Martin, J.).
7 Congress’s “guaranteed issue” and “community rating” regulations of the health
8 insurance industry are, without question, valid exercises of its commerce power. *See id.*
9 at *13 (Martin, J.). And learning from the experience of state regulators, Congress
10 recognized that these insurance industry regulations could not succeed if participants in
11 the health care market could wait to buy insurance until an acute medical need arises.
12 *See SMF ¶¶ 37-43.* Congress accordingly concluded that its failure to include a
13 minimum coverage requirement “would leave a gaping hole” in the regulatory scheme.
14 *Raich*, 545 U.S. at 22; *see Thomas More*, 2011 WL 2556039, at *14 (Martin, J.)
15 (explaining that it “was reasonable for Congress to conclude that failing to regulate those
16 who self-insure would ‘leave a gaping hole’ in the Act”). Thus, even if the means of
17 payment for health care services were not regarded as “commercial,” Congress may
18 properly regulate based on its conclusion that the “failure to regulate that class of activity
19 would undercut the regulation of the interstate market[.]” *Raich*, 545 U.S. at 18; *see also*
20 *id.* at 37-38 (Scalia, J., concurring in the judgment); *Thomas More*, 2011 WL 2556039, at
21 *12 (“[E]ven if self-insuring the cost of health care were not economic activity with a
22 substantial effect on interstate commerce, Congress could still properly regulate the
23
24
25
26
27
28

1 practice because the failure to do so would undercut its regulation of the larger interstate
2 markets in health care delivery and health insurance.”) (Martin, J.).

3 Although crucial to a consumer’s ability to pay for health care, affordable health
4 insurance is in increasingly short supply. SMF ¶¶ 23-26. Between 1999 and 2010,
5 average premiums for employer-sponsored family coverage increased 138 percent. SMF
6 ¶ 25 (citing KAISER FAMILY FOUND., EMPLOYER HEALTH BENEFITS 2010 ANNUAL
7 SURVEY 31, tbl 1.11 (2010)). These “[p]remium increases are driving people out of the
8 insurance market.” *47 Million & Counting: Why the Health Care Marketplace Is*
9 *Broken: Hearing Before the S. Comm. on Fin.*, 110th Cong. 49 (2008) (Statement of Prof.
10 Hall); SMF ¶ 24. As a result, between 2000 and 2009, the portion of the non-Medicare-
11 eligible population covered by private insurance slipped from about 3/4 to about 2/3.
12 SMF ¶ 25 (citing John Holahan, *The 2007-09 Recession and Health Insurance Coverage*,
13 30 HEALTH AFFAIRS 145, 148 (2011)). More than 50 million Americans went without
14 insurance in 2009. *See* SMF ¶ 12 (citing U.S. CENSUS BUREAU, INCOME, POVERTY, AND
15 HEALTH INSURANCE COVERAGE IN THE UNITED STATES: 2009, at 23, Table 8) (2010).

16
17
18
19
20 These trends are largely due to an insurance industry screening process known as
21 “medical underwriting,” a practice that makes health insurance difficult or impossible to
22 obtain for the 50 to 129 million non-elderly Americans who have at least one pre-existing
23 medical condition. SMF ¶¶ 16-18. Medical underwriting also increases premiums even
24 for those who do obtain commercial insurance because of the high costs of the
25 underwriting process itself. The Act addresses these problems by barring insurance
26
27
28

1 companies from denying coverage or setting premiums based on an individual's medical
2 condition or history. 42 U.S.C. §§ 300gg, 300gg-1, 300gg-3(a), 300gg-4(a). But these
3 guaranteed issue and community rating requirements would not work in a regulatory
4 scheme that permits health care consumers to time their insurance purchases. *See SMF*
5 ¶¶ 37-43. Indeed, a "health insurance market could never survive or even form if people
6 could buy their insurance on the way to the hospital." *Id.* ¶ 43 (quoting *47 Million &*
7 *Counting*, 110th Cong. 52 (Prof. Hall)).
8
9

10 Congress found that, absent the minimum coverage provision, "many individuals
11 would wait to purchase health insurance until they needed care." 42 U.S.C.
12 § 18091(a)(2)(I). Accordingly, Congress concluded, the minimum coverage requirement
13 "is essential to creating effective health insurance markets that do not require
14 underwriting and eliminate its associated administrative costs." *Id.* § 18091(a)(2)(J).
15 The legislative record showed that the absence of a minimum coverage requirement had
16 undermined guaranteed issue and community rating reform efforts in states such as New
17 Jersey and New York. *SMF* ¶¶ 40-41. In these circumstances, many consumers "will go
18 without insurance when they are healthy, but then have the privilege of throwing
19 themselves on the mercy of community-rated premiums when they fall ill." *Id.* ¶ 39
20 (quoting *Making Health Care Work for American Families: Improving Access to Care:*
21 *Hearing Before the H. Comm. on Energy and Commerce, Subcomm. on Health*, 111th
22 Cong. 11 (2009) (Prof. Reinhardt)). This in turn causes premiums to go up, which results
23 in still fewer people getting health insurance. *Id.* ¶¶ 39-40. Describing the results of the
24
25
26
27
28

1 New Jersey reforms, Professor Reinhardt explained that “[i]t is well known that
2 community-rating and guaranteed issue, coupled with voluntary insurance, tends to lead
3 to a death spiral of individual insurance.” *Id.* ¶ 40; *see also* Alan C. Monheit, et al.,
4 *Community Rating & Sustainable Individual Health Insurance Markets in New Jersey*, 23
5 *HEALTH AFFAIRS* 167, 168 (2004).

7 In the wake of similar legislation enacted in New York, there was “a dramatic
8 exodus of indemnity insurers from New York’s individual market.” *Id.* ¶ 41 (quoting
9 Mark Hall, *An Evaluation of New York’s Reform Law*, 25 *J. HEALTH POL., POL’Y & L.*
10 71, 91-92 (2000)). And, when Maine enacted similar legislation, most health insurers
11 withdrew from the state. *See id.* ¶ 41 (citing *Health Reform in the 21st Century:*
12 *Insurance Market Reforms: Hearing Before the H. Comm. on Ways & Means*, 111th
13 Cong. 117 (2009) (letter of Phil Caper, M.D., & Joe Lendvai)).

16 In contrast, Congress found that Massachusetts avoided some of these perils by
17 enacting a minimum coverage provision as part of its broader insurance reforms. SMF ¶
18 42. That provision “has strengthened private employer-based coverage: despite the
19 economic downturn, the number of workers offered employer-based coverage has
20 actually increased.” 42 U.S.C. § 18091(a)(2)(D); *see* SMF ¶ 42. But Massachusetts itself
21 attests that the “interstate flow of patients (including uninsured patients) [illustrates] that
22 individual states cannot effectively account for, let alone mitigate, the impact of
23 healthcare trends felt on the national and interstate levels.” Br. of the Commonwealth of
24 Massachusetts as Amicus Curiae in Support of Appellants at 13, *State of Florida v. U.S.*
25
26
27
28

1 *Dep't of Health & Human Servs.*, No. 11-11021 (11th Cir. filed Apr. 11, 2011); *see* SMF
2 ¶ 42. The record thus fully supports the congressional finding that, given the national
3 insurance reforms that it sought to make, a nationwide minimum coverage provision “is
4 essential to creating effective health insurance markets in which improved health
5 insurance products that are guaranteed issue and do not exclude coverage of pre-existing
6 conditions can be sold.” 42 U.S.C. § 18091(a)(2)(I); *see Thomas More*, 2011 WL
7 2556039, at *14 (“Congress had a rational basis for concluding that the minimum
8 coverage requirement is essential to its broader reforms to the national markets in health
9 care delivery and health insurance.”); *see also Liberty Univ., Inc. v. Geithner*, 753 F.
10 Supp. 2d 611, 634 (W.D. Va. 2010), *appeal pending*, No. 10-2347 (4th Cir.) (same);
11 SMF ¶¶ 28-43.

12
13
14
15 **B. The Minimum Coverage Provision Is a Necessary and Proper Means of**
16 **Regulating Interstate Commerce**

17 **1. Courts accord broad deference to the means adopted by Congress**
18 **to advance legitimate regulatory goals**

19 Plaintiffs do not dispute Congress’s conclusion that, in general, people who obtain
20 health care services without insurance shift substantial costs to other market participants.
21 Nor have they disputed the notion that the minimum coverage provision is essential to the
22 Affordable Care Act’s broader regulatory scheme. Nor has any court concluded that
23 Congress’s findings were irrational. Instead, plaintiffs and others who have opposed the
24 minimum coverage provision complain of the means that Congress chose to regulate
25 payment in the interstate market for health care services. No proper basis exists,
26
27
28

1 however, to override Congress’s judgment about the appropriate means to achieve its
2 legitimate regulatory objectives.

3 “The Federal ‘Government is acknowledged by all to be one of enumerated
4 powers,’” but, “at the same time, ‘a government, entrusted with such’ powers ‘must also
5 be entrusted with ample means for their execution.’” *United States v. Comstock*, 130 S.
6 Ct. 1949, 1956 (2010) (quoting *McCulloch v. Maryland*, 17 U.S. 316, 405, 408 (1819)).
7 Accordingly, “where Congress has the authority to enact a regulation of interstate
8 commerce, ‘it possesses every power needed to make that regulation effective.’” *Raich*,
9 545 U.S. at 36 (Scalia, J., concurring in the judgment) (quoting *United States v.*
10 *Wrightwood Dairy Co.*, 315 U.S. 110, 118-19 (1942)).

11 Thus, “the relevant inquiry” under the Necessary and Proper Clause “is simply
12 whether the means chosen are ‘reasonably adapted’ to the attainment of a legitimate end
13 under the commerce power or under other powers that the Constitution grants Congress
14 the authority to implement.” *Comstock*, 130 S. Ct. at 1957 (quoting *Raich*, 545 U.S. at 37
15 (Scalia, J., concurring in the judgment)). “[I]n determining whether the Necessary and
16 Proper Clause grants Congress the legislative authority to enact a particular federal
17 statute,” the Court asks “whether the statute constitutes a means that is rationally related
18 to the implementation of a constitutionally enumerated power.” *Comstock*, 130 S. Ct. at
19 1956 (citing *Sabri v. United States*, 541 U.S. 600, 605 (2004); *Raich*, 545 U.S. at 22;
20 *United States v. Lopez*, 514 U.S. 549, 557 (1995); and *Hodel v. Va. Surface Mining &*
21 *Reclamation Ass’n*, 452 U.S. 264, 276 (1981)).

1 **2. The minimum coverage requirement is plainly adapted to the**
2 **unique conditions of the market for health care services**

3 Contrary to plaintiffs' assertions, *see* Pls.' Mem. at 28, the means chosen by
4 Congress to effectuate the Affordable Care Act's regulatory goals are closely tailored to
5 the unique features of the market for health care services. SMF ¶¶ 3-18, 28-43.
6 Participation in this market is essentially universal. *Id.* ¶ 3. The need for medical
7 treatment may arise unexpectedly, and is not a matter of choice. *Id.* ¶ 4, 7. The cost of
8 care, absent insurance, may overwhelm the typical family budget. *Id.* ¶ 4-7. And—
9 unlike in other markets, including the markets for transportation or courier services, *see*
10 Pls.' Mem. at 22—individuals can expect to receive expensive medical services in times
11 of need without regard to their ability to pay. *See Thomas More*, 2011 WL 2556039, at
12 *32 (“Regulating how citizens pay for what they already receive (health care), never
13 quite know when they will need, and in the case of severe illnesses or emergencies
14 generally will not be able to afford, has few (if any) parallels in modern life.” (Sutton,
15 J.)); *see also* SMF ¶¶ 10-15.
16
17
18
19

20 A government requirement to purchase insurance in order to avoid the
21 externalization of costs is hardly novel. Indeed, insurance requirements are
22 commonplace in the United States Code. *See, e.g.*, 49 U.S.C. § 13906(a)(1) (interstate
23 motor carriers). In the case of vehicle insurance, the requirement typically coincides with
24 the obligation to register one's automobile. But, while it is sensible for the government
25 to make automobile insurance a condition for use of the highways, it would be entirely
26 unacceptable to impose a similar requirement on the use of an emergency room. For,
27
28

1 although “society feels no obligation to repair” the Porsche of the uninsured motorist,
2 “[i]f a man is struck down by a heart attack in the street, Americans will care for him
3 whether or not he has insurance,” even if that means “more prudent citizens end up
4 paying the tab.” SMF ¶ 14 (quoting Stuart Butler, *The Heritage Lectures 218: Assuring*
5 *Affordable Health Care for All Americans*, at 6 (Heritage Found. 1989)).
6

7 Even before the enactment of the Emergency Medical Treatment and Labor Act
8 (“EMTALA”) in 1986, state courts and legislatures had responded to the changing role of
9 private hospitals and of emergency rooms by creating tort liability for the failure to
10 provide emergency services. *Id.* ¶ 13-14. The common law has evolved to preclude
11 hospitals from turning away patients with emergency needs because they will be unable
12 to pay for services. *See id.* The modern rule is that “liability on the part of [the] hospital
13 may be predicated on the refusal of service to a patient in case of an unmistakable
14 emergency.” *Wilmington Gen. Hosp. v. Manlove*, 174 A.2d 135, 140 (Del. 1961). In
15 addition to “state court rulings impos[ing] a common law duty on doctors and hospitals to
16 provide necessary emergency care,” by 1985, “at least 22 states [had] enacted statutes or
17 issued regulations requiring the provision of limited medical services whenever an
18 emergency situation exists[.]” H.R. REP. NO. 99-241, pt. III, at 5, *reprinted in* 1986
19 U.S.C.C.A.N. 726, 727; *see also Guerrero v. Copper Queen Hosp.*, 537 P.2d 1329, 1331
20 (Ariz. 1975) (noting that the State of Arizona requires Samaritan and other private health
21 care providers to provide necessary emergency medical services to all patients regardless
22 of their ability to pay).
23
24
25
26
27
28

1 These measures were not adequate, however, to prevent hospitals from diverting
2 patients or discharging them prematurely. Congress thus enacted EMTALA to end the
3 practice of “patient dumping” by “ensur[ing] that individuals, regardless of their ability to
4 pay, receive adequate emergency medical care,” *Bryant v. Adventist Health Sys./West*,
5 289 F.3d 1162, 1165 (9th Cir. 2002); *cf.* H.R. REP. NO. 99-241, pt. 1, at 27 (1985),
6 *reprinted in* 1986 U.S.C.C.A.N. 42, 605. The federal statute augmented the duties
7 imposed under state law by requiring all hospitals that participate in Medicare and offer
8 emergency services to stabilize anyone entering the emergency room with an emergency
9 condition, without regard to ability to pay. 42 U.S.C. § 1395dd. Of course, after these
10 individuals are stabilized, they are billed, and people may then go into debt or be driven
11 into bankruptcy as a result of this or other expensive treatment, and any unpaid expenses
12 are shifted elsewhere in the market. SMF ¶¶ 15-24.

16 Congress properly adapted the minimum coverage provision to these practical
17 realities of the national health care market. Most significantly, as noted, with health
18 insurance, timing is critical. The societal judgment reflected in both EMTALA and the
19 common law is that it would be unconscionable to deny emergency medical care to
20 someone without insurance. Congress therefore could not ethically have tied an
21 insurance requirement to the availability of emergency medical care at the time it is
22 received.² Moreover, from a purely economic standpoint, a health insurance market
23 could never survive “if people could simply buy their insurance on the way to the
24

27 ² Nor could such a requirement work as a practical matter, given the risk that even
28 individuals who had insurance might be turned away at the emergency room door if they
were required to present proof of insurance and did not happen to have it on their person.

1 hospital.” *Id.* ¶ 43 (quoting *47 Million and Counting*, 110th Cong. 14 (statement of Prof.
2 Hall)). Insurance is a means of financing economic risk, and to be practical and ethical, a
3 requirement to obtain medical insurance must therefore apply before the medical services
4 are actually needed.

5
6 **3. Congress can regulate participants in the national health care
7 market, even if they do not currently maintain insurance coverage**

8 Plaintiffs’ claim is that Congress may not force an ostensibly passive individual to
9 purchase insurance. Pls.’ Mem. at 25. Their claim disregards the nature of the regulatory
10 scheme that Congress enacted. Plaintiffs cannot dispute that “the individuals subject to
11 [the minimum coverage provision] are either present or future participants in the national
12 health care market.” *Mead*, 766 F. Supp. 2d at 36. Indeed, as the Sixth Circuit
13 concluded, whether individuals decide to purchase private health insurance or self-insure,
14 “[n]o one is inactive when deciding how to pay for health care.” *Thomas More*, 2011
15 WL 2556039, at *29 (Sutton, J.). Accordingly, Congress may regulate the economic
16 conduct of participants in the health care market, even if at a given moment those
17 participants are not signed up to finance their health care expenses through insurance.
18
19
20

21 Plaintiffs’ theory restates arguments that have been repeatedly rejected by the
22 Supreme Court. In *Raich*, the Court upheld the application of the Controlled Substances
23 Act to the possession of marijuana that was grown at home for personal use. The
24 Supreme Court found it irrelevant that the plaintiffs were not engaged in commercial
25 activity and that they did not buy, sell, or distribute any portion of the marijuana that they
26 possessed. The regulation was proper, the Court held, because “Congress had a rational
27
28

1 basis for concluding that leaving home-consumed marijuana outside federal control
2 would . . . affect price and market conditions.” *Raich*, 545 U.S. at 19. And that rational
3 basis did not rest on the plaintiffs’ own conduct but on the market’s structural forces that
4 created a “likelihood” that the plaintiffs would be drawn into an interstate market
5 regardless of their stated intent. *Id.* at 18. Under that structure, the plaintiffs’ marijuana
6 was “never more than an instant from the interstate market.” *Id.* at 40 (Scalia, J.,
7 concurring in judgment). In the aggregate, the failure to regulate home consumption such
8 as the plaintiffs’ would have a “substantial effect on supply and demand in the national
9 market for that commodity.” *Id.* at 19.

12 *Raich* reflected principles established more than half a century earlier in *Wickard*,
13 which upheld the federal regulation of wheat that was grown and consumed on a family
14 farm as part of a program to control the volume and price of wheat moving in interstate
15 commerce. The Supreme Court sustained that exercise of the commerce power even
16 though the wheat at issue was not “sold or intended to be sold,” *Wickard*, 317 U.S. at
17 119, even though the home consumption of wheat by any individual “may be trivial by
18 itself,” *id.* at 127, and even though the regulation “forc[ed] some farmers into the market
19 to buy what they could provide for themselves,” *id.* at 129.

23 “While the unique nature of the market for health care and the breadth of the Act
24 present a novel set of facts for consideration, the well-settled principles expounded in
25 *Raich* and *Wickard* control the disposition of this claim.” *Liberty Univ. Inc.*, 753 F.
26 Supp. 2d at 633. The plaintiffs in *Raich* and *Wickard* could not exempt themselves from
27
28

1 regulation by declaring themselves to be “inactive” in a market, where the category of
2 behavior that they were engaged in had concrete effects on the larger interstate market.³
3 Similarly, the claim that an uninsured individual is “inactive” ignores that health
4 insurance is not a stand-alone consumer product, but instead is the principal means of
5 financing participation in the health care market. “Regardless of whether one relies on an
6 insurance policy, one’s savings, or the backstop of free or reduced-cost emergency room
7 services, one has made a choice regarding the method of payment for the health care
8 services one expects to receive.” *Liberty Univ. Inc.*, 753 F. Supp. 2d at 633.
9
10

11 Even if the uninsured population does not currently participate in the health
12 *insurance* market (though any given individual likely had or will have insurance in the
13 near past or future),⁴ it indisputably participates in the larger market for health care
14 services. SMF ¶¶ 3-4, 19-21. Thus, plaintiffs’ assertion “that the Commerce Clause
15 power does not extend to regulations which require individuals to enter a market they
16 would otherwise choose to remain outside of is irrelevant to this case.” *Mead*, 766 F.
17 Supp. 2d at 37. Nothing required Congress to focus exclusively on the submarket that
18 plaintiffs define, and nothing barred Congress from focusing on economic conduct in the
19 health care market. Some individuals may prefer to pay for their participation in that
20 larger market out of pocket rather than through insurance. But that type of economic
21
22
23

24
25 ³ Here, Coons is arguably more “active” in the interstate market than Raich or Filburn.
26 Coons does not deny that he is a consumer of services in the health care market; by
27 contrast, the plaintiffs in *Raich* and *Wickard* claimed they would not enter the marijuana
28 or wheat markets.

⁴ See SMF ¶ 10 (observing that “[o]f those who are uninsured at some point in a given year, about 63% have coverage at some other point during the same year”).

1 preference—which, Congress recognized to have had adverse market consequences on a
2 classwide basis—is plainly subject to regulation under the Commerce Clause. Congress
3 had a rational basis to conclude that the uninsured shift billions of dollars annually on to
4 other market participants when they use health care services for which they do not fully
5 pay. Under this “common sense understanding of the [market] forces” at issue, Congress
6 has the authority to regulate. *See United States v. Rodia*, 194 F.3d 465, 478 (3d Cir.
7 1999) (upholding federal ban on intrastate possession of child pornography based on
8 court’s recognition of the nexus between the regulated intrastate behavior and the
9 interstate market).
10
11

12 Moreover, the uninsured population benefits directly from the Act’s regulatory
13 reforms. As noted, the Act prohibits insurers from denying coverage to, or charging
14 more, for persons with pre-existing conditions. 42 U.S.C. §§ 300gg, 300gg-1, 300gg-
15 3(a), 300gg-4(a). The Act makes everyone insurable, and thus provides tangible
16 protection against the risk of being left destitute by catastrophic medical expenses. *See*
17 42 U.S.C. § 18091(a)(2)(G) (62% of all personal bankruptcies are caused in part by
18 medical expenses). Even apart from the other rational bases for Congress’s choice of
19 means, “[t]his benefit makes imposing the minimum coverage provision appropriate.”
20
21
22
23 *Thomas More Law Center v. Obama*, 720 F. Supp. 2d 882, 894 (E.D. Mich. 2010).

24 Plaintiffs’ theory—that conduct can be exempted from federal regulation simply
25 by attaching the label of “inactivity” or “consumption” to that conduct—disregards the
26 “broad principles of economic practicality” that underlie the commerce power. *Lopez*,

28

1 514 U.S. at 571 (Kennedy, J., concurring). The Court has long held that “questions of the
2 power of Congress are not to be decided by reference to any formula which would give
3 controlling force to nomenclature” without regard to “the actual effects of the activity in
4 question upon interstate commerce.” *Wickard*, 317 U.S. at 120; *see also Swift Co. v.*
5 *United States*, 196 U.S. 375, 398 (1905) (“commerce among the states is not a technical
6 legal conception, but a practical one, drawn from the course of business”); *cf. Brown*
7 *Shoe Co. v. United States*, 370 U.S. 294, 336-337 (1962) (Congress chose in the Clayton
8 Act to “prescribe[] a pragmatic, factual approach to the definition of the relevant market
9 and not a formal, legalistic one”). Indeed, the Supreme Court has expressly rejected the
10 relevance of any distinction between “production” and “consumption” for purposes of
11 Commerce Clause analysis. *Wickard*, 317 U.S. at 124.

12
13
14
15 Moreover, plaintiffs’ “inactivity” fallacy not only ignores Congress’s considered
16 judgment but also is illogical. After all, if the uninsured were truly “passive” with
17 respect to the relevant market, they could not shift costs to others through their
18 participation in that market. *Cf. SMF ¶¶ 19-24*. It is the *conduct* of the uninsured, due to
19 their participation in the health care market, that Congress identified as having a
20 substantial economic effect on interstate commerce, due to the significant amount of
21 uncompensated care that the uninsured receive, which shifts costs to others and drives up
22 prices of both health care services and health insurance premiums. 42 U.S.C.
23 § 18091(a)(2)(F). Indeed, “the notion that self-insuring amounts to inaction and buying
24 insurance amounts to action is not self-evident[,]” particularly where, “[i]f done
25
26
27
28

1 responsibly, the former requires more action (affirmatively saving money on a regular
2 basis and managing the assets over time) than the latter (writing a check once or twice a
3 year or never writing one at all if the employer withholds the premiums).” *Thomas More*,
4 2011 WL 2556039, at *28 (Sutton, J.). Thus, “self-insurance and private insurance are
5 two forms of action for addressing the same risk. Each requires affirmative choices; one
6 is no less active than the other; and both affect commerce.” *Id.* at *29. Congress plainly
7 has the authority to regulate conduct that has substantial economic effects in the interstate
8 market with which it is concerned.⁵

11 **4. Congress’s rational basis for enacting the Affordable Care Act**
12 **does not depend upon attenuated links to interstate commerce**

13 Plaintiffs’ reliance on the holdings of *Lopez* and *Morrison*, the only modern cases
14 to invalidate federal statutes as beyond the commerce power, is misplaced. Both statutes
15 were stand-alone measures that involved no economic regulation. In *Lopez*, the Supreme
16 Court struck down a ban on possession of a handgun in a school zone because the ban
17 was related to economic activity only insofar as the presence of guns near schools might
18 impair learning, which in turn might undermine economic productivity. Similarly, in
19 *Morrison*, the Court invalidated a tort cause of action established by the Violence Against
20 Women Act, explaining that it would require a chain of speculative assumptions to

23 ⁵ Similarly unavailing is plaintiffs’ argument that the term “regulate” “means to govern
24 activity that is already ongoing or is initiated in [an] independent way. It does not mean
25 to compel or require activity.” Pls.’ Mem. at 18. This argument ignores the undeniable
26 fact that Congress has both the power to “prescribe and proscribe” rules of conduct, and
27 that, in the legislative context, Congress may enact “rules of conduct, some which require
28 action.” *Thomas More*, 2011 WL 2556039, at *28 (Sutton, J.) (observing that federal
sex-offender registration laws and federal laws governing child support payments compel
some action on the part of certain individuals).

1 connect gender-motivated violence with interstate commerce. Neither of these measures
2 played any role in a broader regulation of economic activity. *Lopez*, 514 U.S. at 561.
3 Indeed, the “noneconomic, criminal nature of the conduct at issue was central” to the
4 Court’s decisions. *Morrison*, 529 U.S. at 610; *see also Sabri*, 541 U.S. at 607.
5

6 The minimum coverage provision, in contrast, “steers clear of the central defect in
7 the laws at issue in *Lopez* and *Morrison*. Health care and the means of paying for it are
8 ‘quintessentially economic’ in a way that possessing guns near schools . . . and domestic
9 violence . . . are not.” *Thomas More*, 2011 WL 2556039, at *25 (Sutton, J.) (citation
10 omitted). The provision is also part of a broad economic regulation of health care
11 financing in the massive interstate health care market, and it is essential to the Act’s
12 guaranteed issue and community rating reforms. Moreover, the minimum coverage
13 provision regulates economic conduct—the means of payment for health care services in
14 a market that accounts for over one-sixth of the nation’s GDP. *See SMF* ¶ 1. Indeed, it is
15 difficult to conceive of legislation that is more clearly economic.
16
17
18

19 Likewise, “[n]o one must ‘pile inference upon inference’ . . . to recognize that the
20 national regulation of a \$2.5 trillion industry, much of which is financed through ‘health
21 insurance . . . sold by national or regional health insurance companies’ . . . is economic in
22 nature.” *Id.* (Sutton, J.). As noted, the Supreme Court has clearly held that Congress
23 may consider the effects of an entire class of conduct “in the aggregate.” *Raich*, 545 U.S.
24 at 22. And, in the aggregate, the direct result of the decision to attempt to pay for health
25 care expenses out of pocket is that “Congress’s efforts to stabilize prices for [health
26
27
28

1 insurance] are thwarted.” *Mead*, 766 F. Supp. 2d at 34. Thus, “there is no need for
2 metaphysical gymnastics of the sort proscribed by *Lopez*” to understand the direct
3 connection between choosing to forego insurance, on the one hand, and cost-shifting—
4 which is the very thing that, according to Congress, has a substantial effect on interstate
5 commerce—on the other. *Thomas More*, 720 F. Supp. 2d at 894.

7 Ultimately, the concerns underlying the Supreme Court’s decisions in *Lopez* and
8 *Morrison* are inapplicable here. Those cases sought to avoid a view of economic
9 causation so broad that it would “obliterate the distinction between what is national and
10 what is local in the activities of commerce.” *Morrison*, 529 U.S. at 616 n.6 (quotations
11 omitted). By contrast, the problems that are addressed by the Affordable Care Act are by
12 no means local. “The modern health care system is highly interdependent and operates
13 across state boundaries.” SMF ¶ 28 (quoting Sara Rosenbaum, *Can States Pick Up the*
14 *Health Reform Torch?*, 362 NEW ENG. J. MED. e29, at 3 (2010)); see *Freilich v. Upper*
15 *Chesapeake Health, Inc.*, 313 F.3d 205, 213 (4th Cir. 2002) (“Hospitals are regularly
16 engaged in interstate commerce, performing services for out-of-state patients and
17 generating revenues from out-of-state sources.”) (citing *Summit Health, Ltd. v. Pinhas*,
18 500 U.S. 322, 329-30 (1991)); Amicus Br. of the Commonwealth of Massachusetts in
19 Support of Appellant at 12-13, *State of Florida et al. v. U.S. Dep’t of Health & Human*
20 *Servs.*, No. 11-11021 (11th Cir. filed Apr. 11, 2011). As just one example,
21 Pennsylvanians make over 1500 emergency room visits each year to a hospital across
22 state lines in West Virginia, resulting in over \$820,000 owed, and not yet paid, for visits
23
24
25
26
27
28

1 that occurred in fiscal year 2007 alone. *See* SMF ¶ 28 (citing Amicus Br. of the
2 Governors of Washington, Colorado, Michigan, and Pennsylvania, *State of Florida v.*
3 *HHS*, No. 3:10-cv-91 (N.D. Fla. filed Nov. 19, 2010), at 9). Congress reasonably found
4 that the Act’s national standards were required to ensure that employers and individuals
5 would not be subject to a state-by-state “patchwork of requirements and protections.”
6 H.R. REP. NO. 111-443, pt. I, at 211-12 (2010). The minimum coverage provision, a
7 quintessentially economic regulation, addresses national problems that arise in the
8 context of a vast interstate market. It is a means reasonably adapted to that legitimate
9 end.
10
11

12 This fact rebuts plaintiffs’ claim that upholding the minimum coverage
13 provision—regulating “inactivity,” in their parlance—obliterates any limitations on the
14 Commerce Clause. *Lopez* and *Morrison* imposed limits that have nothing to do with
15 “activity” or “inactivity.” The minimum coverage provision falls well within those
16 boundaries, and upholding the provision leaves them unaltered.
17
18

19 **II. CONGRESS ENACTED THE MINIMUM COVERAGE PROVISION**
20 **PURSUANT TO ITS INDEPENDENT POWER UNDER THE GENERAL**
21 **WELFARE CLAUSE**

22 Plaintiffs’ challenge fails for an additional reason. Independent of its power under
23 the Commerce Clause, Congress has the “Power To lay and collect Taxes, Duties,
24 Imposts and Excises, to pay the Debts and provide for the common Defence and general
25 Welfare of the United States.” U.S. CONST. art. I, § 8, cl. 1. Congress’s power to collect
26 revenue and make expenditures under the General Welfare Clause is “comprehensive.”
27
28

1 *Charles C. Steward Machine Co. v. Davis*, 301 U.S. 548, 581 (1937); *see also Veazie*
2 *Bank v. Fenno*, 75 U.S. 533, 541 (1869) (“[I]t was the intention of the Convention that
3 the whole power should be conferred....”). Indeed, Congress may use its general welfare
4 authority for purposes beyond its powers under other provisions of Article I. *See United*
5 *States v. Sanchez*, 340 U.S. 42, 44 (1950) (“Nor does a tax statute necessarily fall because
6 it touches on activities which Congress might not otherwise regulate.”); *Knowlton v.*
7 *Moore*, 178 U.S. 41, 59-60 (1900) (Congress may tax inheritances, even if it may not
8 regulate them under the Commerce Clause); *United States v. Doremus*, 249 U.S. 86, 94
9 (1919). As long as a statute is “productive of some revenue,” Congress may exercise its
10 taxing powers irrespective of any “collateral inquiry as to the measure of the regulatory
11 effect of a tax.”⁶ *Sonzinsky v. United States*, 300 U.S. 506, 514 (1937); *see also United*
12 *States v. Gianni*, 455 F.2d 147, 148 (9th Cir. 1972). In determining whether a
13 congressional enactment is authorized under the taxing power, the only question is
14 therefore whether the regulation bears “some reasonable relation” to the “raising of
15 revenue.” *Doremus*, 249 U.S. at 93-94; *see also J.W. Hampton, Jr., & Co. v. United*
16 *States*, 276 U.S. 394, 412 (1928) (“motive” and “effect” “to secure revenue” bring
17 measure within taxing power, even if Congress announces other motives to regulate

18
19
20
21
22
23 ⁶ *Sonzinsky* forecloses plaintiffs’ argument that the minimum coverage provision is an
24 invalid exercise of Congress’s taxing power because its purpose is regulatory. *See Pls.’*
25 *Mem.* at 32. As the Supreme Court recognized, “[e]very tax is in some measure
26 regulatory” in that “it interposes an economic impediment to the activity taxed as
27 compared with others not taxed.” *Sonzinsky*, 300 U.S. at 513. “[C]ourts have sustained
28 taxes although imposed with the collateral intent of effecting ulterior ends which,
considered apart, were beyond the constitutional power of the lawmakers to realize by
legislation directly addressed to their accomplishment.” *Sanchez*, 340 U.S. at 44-45
(internal quotation and citation omitted).

1 commerce).

2 In contrast to the Sixth Circuit's conclusion, *see Thomas More*, 2011 WL
3 2556039, at *17-21 (Sutton, J.), the minimum coverage provision falls within Congress's
4 comprehensive taxing power. The Affordable Care Act requires "taxpayers" not exempt
5 to obtain "minimum essential coverage" or pay a penalty. 26 U.S.C. § 5000A(a), (b)(1).
6 "Taxpayers" who are not required to file income tax returns for a given year are not
7 subject to this provision. 26 U.S.C. § 5000A(e)(2). If the penalty applies, the taxpayer
8 must report it on his income tax return for the taxable year, as an addition to his income
9 tax liability. 26 U.S.C. § 5000A(b)(2). The resulting penalty is a percentage of the
10 taxpayer's household income, subject to a floor and a cap of the national average
11 premium for the lowest-tier plans offered in the new Exchanges for the taxpayer's family
12 size. 26 U.S.C. § 5000A(c)(1), (2). The taxpayer's responsibility for his family members
13 turns on their status as dependents under the Internal Revenue Code. 26 U.S.C. §
14 5000A(a), (b)(3). The Secretary of the Treasury is empowered to enforce the provision,
15 and he collects the penalty in the same manner as other assessable penalties under the
16 Internal Revenue Code. 26 U.S.C. § 5000A(g).⁷

17
18
19
20
21
22 Because the provision, where it applies, will increase a taxpayer's total liability,
23 there can be no dispute that the provision will be "productive of some revenue."
24 *Sonzinsky*, 300 U.S. at 514. Indeed, the Congressional Budget Office ("CBO") estimated
25 that \$4 billion in revenues will be derived each year from the provision when it is fully in
26

27 ⁷ The Secretary of the Treasury may not collect the penalty through notice of federal tax
28 liens or levies, and may not bring a criminal prosecution for a failure to pay it. 26 U.S.C.
§ 5000A(g)(2).

1 effect. *See* SMF ¶ 44 (citing Letter from Douglas W. Elmendorf, Director, CBO, to the
2 Hon. Nancy Pelosi, Speaker, U.S. House of Representatives 2 tbl. 4 (Mar. 20, 2010)).
3 Plaintiffs attempt to undermine these facts by arguing that the provision is beyond
4 Congress’s taxing power because “[i]f every individual subject to the [provision]
5 complied, the penalty would produce *no* revenue.” Pls.’ Mem. at 32. But, as the
6 Supreme Court has instructed, “a tax does not cease to be valid merely because it
7 regulates, discourages, or even definitely deters the activities taxed.”⁸ *Sanchez*, 340 U.S.
8 at 44.
9
10

11 Beyond the determinative fact that the minimum coverage provision will be
12 “productive of some revenue,” the provision operates as a tax in every meaningful sense,
13 that is, as a “pecuniary burden laid upon individuals or property for the purpose of
14 supporting the government.” *United States v. New York*, 315 U.S. 510, 515-16 (1942).
15 Congress placed the provision in the Internal Revenue Code; directed that the amount a
16 taxpayer owes under the provision be reported on the taxpayer’s annual tax return and
17 added to the taxpayer’s annual tax liability; and granted enforcement authority to the
18 Secretary of the Treasury. Revenues from the provision go to the general treasury. In all
19 practical respects, the provision is a tax. *Cf. In re Chateaugay Corp.*, 53 F.3d 478, 498
20
21
22
23

24 ⁸ In the same vein, plaintiffs’ argument that the minimum coverage provision is punitive
25 is without merit. As discussed in prior briefing, *see* Defs.’ Reply 22-23,
26 § 5000A has none of the hallmarks of a punishment. It does not have a scienter
27 requirement, *cf. The Child Labor Tax Case*, 259 U.S. 20, 36-37 (1922), and is “not
28 conditioned upon the commission of a crime,” *Sanchez*, 340 U.S. at 45, nor is the penalty
so “exorbitant” that it demonstrates an intent to “punish rather than to tax,” *United States*
v. Constantine, 296 U.S. 287, 294, 295 (1935).

1 (2d Cir. 1995) (“Coal Act was at least partially an exercise of the taxing power,” given
2 placement in Internal Revenue Code and grant of enforcement authority to Treasury).

3 The only basis that has been offered for refusing to recognize the minimum
4 coverage provision as a valid taxing measure is that Congress did not label the § 5000A
5 penalty a “tax.” But the substance of the provision, not its label, is dispositive. *Penn*
6 *Mut. Indem. Co. v. Comm’r of Internal Revenue*, 277 F.2d 16, 20 (3d Cir. 1960) (“the tax
7 itself” need not “bear an accurate label” in order to be upheld as a valid taxing measure).
8 The Supreme Court has emphasized that, “[i]n passing on the constitutionality of a tax
9 law [the Court is] concerned only with its practical operation, not its definition or the
10 precise form of descriptive words which may be applied to it.” *Nelson v. Sears, Roebuck*
11 *& Co.*, 312 U.S. 359, 363 (1941) (internal quotation omitted); *see also United States v.*
12 *Sotelo*, 436 U.S. 268, 275 (1978) (funds owed by operation of Internal Revenue Code had
13 “essential character as taxes” despite statutory label as “penalty”).
14
15
16
17

18 Indeed, Congress was under no obligation to identify the § 5000A penalty as a tax
19 or otherwise expressly invoke the General Welfare Clause in order to enact legislation
20 pursuant to its taxing power.⁹ “The constitutionality of action taken by Congress does
21

22 ⁹ Plaintiffs’ argument that the minimum coverage provision is an unconstitutional
23 direct tax is without merit. As the government explained in prior briefing, the minimum
24 coverage provision conditions its tax on a number of factors, including the receipt of a
25 threshold amount of income, and the absence of qualifying coverage. It is not a direct
26 tax, which is a tax imposed on property “solely by reason of its ownership.” *Knowlton*,
27 178 U.S. at 81; *see Quatry v. United States*, 170 F.3d 961, 970 (9th Cir. 1999). Nor does
28 any precedent require defendants to identify specifically the category of tax—direct,
excise, impost, or duty—in which the minimum coverage penalty provision falls. The
Supreme Court rejected the same argument in *Charles C. Steward Mach. Co.*, upholding
the employment taxes in the Social Security Act against a claim that they did not qualify

1 not depend on recitals of the power which it undertakes to exercise.” *United States v.*
2 *Nelson*, 277 F.3d 164, 178 n.14 (2d Cir. 2002) (quoting *Woods v. Cloyd W. Miller Co.*,
3 333 U.S. 138, 144 (1948)); see *Oregon Short Line R.R. v. Dep’t of Revenue Or.*, 139 F.3d
4 1259, 1266 (9th Cir. 1998) (noting that the constitutionality of congressional action does
5 not depend on recitals of the power which it undertakes to exercise).
6

7 In any event, even if Congress did not expressly invoke its taxing power, as
8 defendants discussed in prior briefing, the word “tax” or a derivative of it appears more
9 than forty times in the minimum coverage provision. Placing the provision in the Tax
10 Code, requiring that compliance be reported on the tax return, providing that any
11 penalties be paid every April 15 with income taxes, and referring repeatedly to the
12 obligations of the taxpayer are all clear indicators that Congress intended the provision to
13 operate as a tax. Moreover, the taxing power was expressly invoked in the Senate to
14 defeat constitutional points of order against the provision. 155 Cong. Rec. S13,830,
15 S13,832 (Dec. 23, 2009). During the floor debates, congressional leaders explicitly
16 defended the provision as an exercise of the taxing power. See, e.g., 156 Cong. Rec.
17 H1882 (Mar. 21, 2010) (statement of Rep. Miller); 156 Cong. Rec. H1824, H1826 (Mar.
18 21, 2010) (statement of Rep. Slaughter); 155 Cong. Rec. S13,751, S13,753 (Dec. 22,
19 2009) (statement of Sen. Leahy); 155 Cong. Rec. S13,581-82 (Dec. 20, 2009) (statement
20
21
22
23
24

25 as “excise.” “The subject-matter of taxation open to the power of the Congress is as
26 comprehensive as that open to the power of the states.” *Id.* at 581. The General Welfare
27 Clause power “may be applied to every object of taxation, to which it extends, in such
28 measure as Congress may determine. . . . [I]t was the intention of the Convention that the
whole power should be conferred. The definition of particular words, therefore, became
unimportant.” *Veazie Bank*, 75 U.S. at 541.

1 of Sen. Baucus). There is no doubt on that score, and no ambiguity arising simply from
 2 the fact that the word “penalty” can be used outside the tax context. If there were such
 3 ambiguity, however, the presumption of constitutionality would dictate that it be resolved
 4 in favor of upholding the provision as an exercise of the taxing power. *See Edward J.*
 5 *DeBartolo Corp. v. Florida Gulf Coast Bldg.*, 485 U.S. 568, 575 n.1 (1988)).
 6

7 **III. THE AFFORDABLE CARE ACT DOES NOT UNCONSTITUTIONALLY**
 8 **DELEGATE LEGISLATIVE POWER TO THE INDEPENDENT**
 9 **PAYMENT ADVISORY BOARD (IPAB)**

10 The only IPAB-related issue remaining here is plaintiffs’ non-delegation doctrine
 11 challenge. After the Supreme Court’s decision in *Nevada v. Carrigan*, plaintiffs
 12 withdrew Count VI, which had asserted that the ACA unconstitutionally prohibits the
 13 repeal of the IPAB. *See* Pls.’ Mem. at 1, ECF No. 51 (voluntarily dismissing Count
 14 VI).¹⁰

15
 16 As for the non-delegation claim, defendants have explained that the pages of
 17 detailed requirements contained in the ACA easily establish the required “intelligible
 18 principle.” In particular, the ACA specifies a list of “considerations” that the Board *must*
 19 take into account (42 U.S.C. § 1395kkk(c)(2)(B)); it contains a general statement of
 20 purpose (*id.* § 1395kkk(b)); and it prohibits the Board from making certain types of
 21 recommendations (*id.* § 1395kkk(c)(2)(A)). The Supreme Court and the Ninth Circuit
 22
 23

24
 25 ¹⁰ For this reason, the ten pages of speculation that the amicus brief devotes to this issue
 26 (*see* Amicus Br. 12-22, ECF No. 53) are irrelevant. “While an amicus may offer
 27 assistance in resolving issues properly before a court, it may not raise additional issues or
 28 arguments not raised by the parties.” *Cellnet Commc’ns Inc. v. FCC*, 149 F.3d 429, 443
 (6th Cir. 1998); *see also Swan v. Peterson*, 6 F.3d 1373, 1383 (9th Cir. 1993)
 (“Generally, we do not consider on appeal an issue raised only by an amicus.”).

1 have upheld statutes containing far broader delegations. *See New York Cent. Sec. Corp.*
2 *v. United States*, 287 U.S. 12, 24-25 (1932) (the “public interest”); *Freedom to Travel*
3 *Campaign v. Newcomb*, 82 F.3d 1431, 1436-38 (9th Cir. 1996) (“in the national
4 interest”). Plaintiffs’ insistence that the IPAB lacks an “intelligible principle” is therefore
5 unsupportable.
6

7 Moreover, plaintiffs and the amicus are wrong to say that the congressional review
8 procedures are the only way that Congress may exert control over the Board’s
9 recommendations. *See, e.g.*, Amicus Br. 6. In fact, the ACA establishes “fast-track”
10 parliamentary procedures to ensure Congress, should it choose to do so, has sufficient
11 time to consider its own legislative alternative to IPAB’s recommendations. As the
12 government has observed, nothing prevents Congress from repealing or suspending the
13 rules governing congressional changes to IPAB recommendations while voting on
14 superseding legislation. Congress is constitutionally entitled to set its own rules. *See*
15 U.S. CONST. art. I, § 5.¹¹
16
17
18

19 **IV. THE MINIMUM COVERAGE PROVISION AND THE PROVISIONS**
20 **CREATING THE IPAB ARE SEVERABLE FROM THE ACA’S**
21 **REMAINING PROVISIONS**

22 Plaintiffs’ insistence that the minimum coverage provision and the provisions of
23 the ACA creating IPAB are not severable from the rest of the ACA is irrelevant, as these
24 provisions fall well within Congress’s constitutional authority. If this Court reaches
25
26

27 ¹¹ The government incorporates by reference the non-delegation doctrine discussions
28 contained in prior briefing. *See* Local Rule 7.1(d).

1 severability, however, it should conclude that these provisions are severable from the vast
2 majority of the ACA's provisions.

3 The Supreme Court has repeatedly held that, "when confronting a constitutional
4 flaw in a statute," courts must "try to limit the solution to the problem, severing any
5 problematic portions while leaving the remainder intact." *Free Enterprise Fund v. Pub.*
6 *Co. Accounting Oversight Bd.*, 130 S. Ct. 3138, 3161 (2010) (internal quotation marks
7 omitted). "[T]he 'normal rule,'" therefore, "is that 'partial, rather than facial, invalidation
8 is the required course' such that a 'statute may ... be declared invalid to the extent that it
9 reaches too far, but otherwise left intact.'" *Ayotte v. Planned Parenthood of N. New*
10 *England*, 546 U.S. 320, 329 (2006) (quoting *Brockett v. Spokane Arcades, Inc.*, 472 U.S.
11 491, 504 (1985)). If provisions are "fully operative as a law," they must be sustained
12 "[u]nless it is evident that the Legislature would not have enacted those provisions ...
13 independently of that which is [invalid]." *Free Enterprise Fund*, 130 S. Ct. at 3161
14 (internal citation and quotation marks omitted).

15 The government's position is that the minimum coverage provision is so closely
16 and inextricably linked to the new guaranteed issue and community rating reforms that
17 those reforms are not severable from that provision. *See, e.g.*, Reply/Response Br. of
18 HHS, et al., *Florida v. HHS*, Nos. 11-11021 & 11-11067 (11th Cir.), at 24-26 (noting that
19 §§ 2701, 2702, 2704 (with respect to adults), and 2705(a) of the Public Health Service
20 Act, as added by § 1201 of the Affordable Care Act are not severable from the minimum
21 coverage provision).

1 But plaintiffs' assertion, *see* Pls.' Mem. at 56-58, that neither the minimum
2 coverage requirement nor the IPAB can be severed from any other provision of the
3 Affordable Care Act for the reasons set forth in the Florida district court decision,
4 *Florida ex rel. Bondi v. HHS*, 2011 WL 285683,*33-39 (N.D. Fla. Jan. 31, 2011), which
5 has been appealed and is awaiting decision by the Eleventh Circuit, is simply wrong. The
6 other provisions of the Act are "fully operative as a law," and plaintiffs have not shown
7 that "the Legislature would not have enacted those provisions . . . independently of" the
8 minimum coverage provision. *Free Enterprise Fund*, 130 S. Ct. at 3161 (quotations
9 omitted); *see also* Reply/Response Br. of HHS, et al., *Florida v. HHS*, at 56-58.

12 The *Florida* court reasoned that "[g]oing through the 2,700–page Act line-by-line,
13 invalidating dozens (or hundreds) of some sections while retaining dozens (or hundreds)
14 of others, would not only take considerable time and extensive briefing, but it would, in
15 the end, be tantamount to rewriting a statute in an attempt to salvage it." *Florida*, 2011
16 WL 285683, at *38. But this conclusion fails to follow the rule that "partial, rather than
17 facial, invalidation is the required course." *Brockett v. Spokane Arcades*, 472 U.S. 491,
18 504 (1985). Indeed, as the *Virginia v. Sebelius*, 728 F. Supp. 2d 768, 789-90 (E.D. Va.
19 2010) court recognized, the Act contains provisions that are plainly severable from the
20 minimum coverage provision and the IPAB. For example, parts of the ACA make
21 changes to Medicare payment rates for 2011, ACA Title III, and "provide for more
22 rigorous enforcement" of drug pricing requirements. *Astra USA, Inc. v. Santa Clara*
23 *Cnty.*, 131 S. Ct. 1342, 1346 (2011). Other provisions re-authorized programs already on
24
25
26
27
28

1 the books, *e.g.*, ACA §§ 4204(c), 5603, amended the False Claims Act, ACA §
2 10104(j)(2), and imposed requirements to eliminate Medicaid waste and fraud, *e.g.*, ACA
3 §§ 6402(h)(2), 6411. Without question, these provisions can survive without the
4 minimum coverage provision or the IPAB provisions.¹²
5

6 Plaintiffs are equally wrong to rely on the lack of a severability clause in the ACA.
7 “In the absence of a severability clause . . . Congress’ silence is just that-silence-and does
8 not raise a presumption against severability.” *Alaska Airlines v. Brock*, 480 U.S. 678,
9 686 (1987). Indeed, even if a severability clause had been removed, the “unexplained
10 disappearance” of text during the progress of a bill is rarely a “reliable indicator[] of
11 congressional intent.” *Mead Corp. v. Tilley*, 490 U.S. 714, 723 (1989). That principle
12 has particular force here because Congress legislated against the background presumption
13 of severability. Indeed, both the Senate Legislative Drafting Manual and the House
14 Legislative Counsel’s Manual on Drafting Style “advise drafters that a ‘severability
15 clause is unnecessary’ unless Congress intends to make certain portions of a statute
16 unseverable.” *Interpreting by the Book: Legislative Drafting Manuals and Statutory*
17 *Interpretation*, 120 *Yale L.J.* 185, 190 (2010). Plaintiffs’ description of the legislative
18 history is, moreover, misleading. Although a bill initially passed by the House contained
19 a severability provision, none appeared in the bills considered by the Senate or enacted as
20 the Affordable Care Act.
21
22
23
24

25
26
27 ¹² Moreover, the Court should not reach the question of the severability of those other
28 provisions. *See Printz v. United States*, 521 U.S. 898, 935 (1997).

CONCLUSION

1
2 Plaintiffs' motion for summary judgment should be denied, and defendants' cross-
3 motion for summary judgment should be granted.
