3rd Lawsuit (Lawsuit against illegal monopolies)
Legislative Vertical Farming Forestry Lawsuit

Lawsuit against 3 major credit bureaus (Equifax, Experian, TransUnion), 3 major mortgage companies (Wells Fargo, J.P. Morgan Chase, Quicken Loans), Amazon.com, Google, and Student Loan Company (Great Lakes Higher Education Corp), for rent-to-own homeless shelters vertical farming forestry that is accessed through H.U.D. and our local housing authorities. I purpose that citizens first mortgage and/or only mortgage should be given without increased rates and fees.

Lawsuit against illegal monopolies forcing me to work for student debt without adequately paid apprenticeship program, Widner University appears to be the only law school in the state of Delaware and maybe unfairly enhancing their character by spying and defaming my character. Lawsuit against major cell phone and communication companies (see attached) Verizon, T-mobile for possible invasion of privacy.

Attached is student debt amount.

Widner University threatened to arrest me if I used their law library and seeked a pro bono attorney.

Civil Case Information Sheet Caption

[There are monopolies (most likely religious) constantly
- spying on me and stealing from me and claiming that
- I am mentally ill for not participating in their religion
- (most likely). I will need a probono attorney, public
- defender, probono investigator, and probono security
- system to defend against ongoing defamation of
- character financial abuse and espionage "death
- sentence" of incrimination homelessness and
- inadequate housing.

I don't know the exact codes these
- companies are violating but I still need a
- trial scheduled to determine whether there
- needs to be amendments to laws, petitions,
- proposals, or voting rights restored.

It seems to be fairly clear judging
- by the better business bureau that there appears
- to be illegal abusive monopolies defaming character
- of minorities and/or majorities of various religions,
- races, genders, orientations with identify manipulation
- employment programs to force an orientation and
- create unnecessary birth defects through
- marriages without the right to vote.

I have 3 seperate lawsuits for
- each branch of the government
1st - Executive Sustainable Energy Lawsuit
2nd - Judicial Recycling Materials Lawsuit
3rd - Legislative Vertical Farming Forestry Lawsuit
