2nd Lawsuit (Lawsuit against illegal monopolies)

## Judicial Recycling Materials Lawsuit

Lawsuit against Amazon.com, Johnson & Johnson, Google for a Medicaid/Medicare naturopathic basic health program of 12 weeks basic training of recycling materials health resort citizenship maintenance. This would guaranteed temporary employment by helping each citizen determine what employment is and what it isn't for unemployment insurance purposes. Each citizen then can choose their employment and/or entrepreneurship training college degree/diploma certifications apprenticeships. This lawsuit is against the illegal monopolies and for Small Business Administration, Department of Labor, Department of Education, AmeriCorps, Career Services of Colleges, Nursing homes, and rehabilitation centers.

Lawsuit against illegal monopolies forcing me to work for student debt with no adequate paid apprenticeship program. Widner University appears to be the only Law school in the state of Delaware and may be unfairly spying and defaming my character to enhance their character.

attached is Student debt amount X Jason I Fitzgerald  
Widner University threatened to arrest me if I went to use their law library and seek a probono attorney.  
Jason I Fitzgerald

# Civil Case Information Sheet Caption

[There are monopolies (most likely religious) constantly  
- spying on me and stealing from me and claiming that  
- I am mentally ill for not participating in their religion  
- (most likely) I will need a pro bono attorney, public  
- defender, pro bono investigator, and pro bono security  
- system to defend against ongoing defamation of  
- character financial abuse and espionage "death  
- sentence" of incrimination homelessness and  
- inadequate housing.

I don't know the exact codes these  
- companies are violating but I still need a  
- trial scheduled to determine whether there  
- needs to be amendments to laws, petitions,  
- proposals, or voting rights restored.

It seems to be fairly clear judging  
- by the better business bureau that there appears  
- to be illegal abusive monopolies defaming character  
- of minorities and/or majorities of various religions,  
- races, genders, orientations with identify manipulation  
- employment programs to force an orientation and  
- create unnecessary birth defects through  
- marriages without the right to vote.

I have 3 separate lawsuits for  
- each branch of the government  
1st - Executive Sustainable Energy lawsuit  
2nd - Judicial Recycling Materials Lawsuit  
3rd - Legislative Vertical Farming Forestry lawsuit
