INTRODUCTION 1

BACKGROUND 2

ARGUMENT 3

 A. Plaintiff has stated a claim under the Wiretap Act, where he has alleged that Defendants intentionally acquired his electronic communications 4

 B. Plaintiff has stated a claim for intrusion upon seclusion by alleging that Defendants invaded his objectively reasonable expectation of privacy 6

 C. Plaintiff has stated a claim under Penal Code section 502, because he has alleged that Defendants’ access to his data was “without permission” 9

 D. Plaintiff has stated a claim under the California Invasion of Privacy Act, where he has alleged an unauthorized connection via email 11

INTRODUCTION

1
2 Defendants ask this Court to validate a destructive, invasive, and harmful online
3 surveillance campaign against Plaintiff. Plaintiff is a school teacher who was placed on
4 administrative leave on February 5, 2013. Plaintiff was instructed to return his work
5 computers. His employer and his employer's chief business officer and co-
6 superintendent, the Defendants here, discovered that one of the work computers had
7 saved passwords to Plaintiff's personal Gmail and Facebook accounts. Instead of
8 notifying Plaintiff about this security vulnerability, Defendants used Plaintiff's passwords
9 to gain access to Plaintiff's private emails, in secret and without his consent. Over the
10 span of six months, Defendants specifically targeted emails exchanged between Plaintiff
11 and his friends and family, Plaintiff and his attorneys, and Plaintiff and his union
12 representative. Defendants printed these emails and even relayed copies to third
13 parties, including Defendants' attorneys. These communications included emails that
14 Plaintiff had sent from his home using his own personal computing devices.

15 With this demurrer, Defendants attack most of Plaintiff's claims, disregarding the
16 straightforward language of various statutes and the principle that Plaintiff's alleged facts
17 must be taken as true. First, Defendants challenge the relevant standard under the
18 Wiretap Act, imposing an unfounded "in transit" requirement. As courts across the
19 country have held, no such requirement exists. Second, Defendants argue that a
20 heightened pleading standard applies to any invasion of privacy claim based on access
21 to a workplace computer. The Supreme Court of the United States recently adopted a
22 contrary understanding of privacy, which accords with the realities of online
23 communication and with common sense. Third, Defendants argue that Plaintiff's claims
24 under section 502(c) of the California Penal Code do not allege that Defendants
25 circumvented a "technical barrier." However, that is precisely what passwords do—they
26 allow individualized access to accounts that are otherwise protected by technical, code-
27 based barriers. If Plaintiff had left his house keys in his classroom, one wonders whether
28 Defendants would have donned ski-masks and pried into his home. Finally, Defendants

1 argue that section 631 of the California Penal Code does not apply to email, cherry-
2 picking isolated snippets of the law that refer to telegraphs and telephones. However,
3 the Supreme Court of California first rejected Defendant’s argument back in 1946, and
4 almost seventy years later, courts continue to extend section 631’s prohibitions to new
5 technology.

6 A work computer should be a tool to assist employees with their workday
7 responsibilities, not a trap to expose their personal lives to employers. This Court should
8 overrule Defendants’ demurrer.

9 **BACKGROUND**

10 Plaintiff has been a teacher with East Whittier City School District (“EWCS D”) since 1999. (FAC ¶20.) At the beginning of the 2012-2013 academic year, EWCS D provided Plaintiff with a laptop, the second of two computers provided to Plaintiff by Defendants (the “Laptop”). (FAC ¶¶22-23.) Defendants allowed Plaintiff to use the Laptop for personal activities that did not interfere with Plaintiff’s workday responsibilities, so long as he did not access inappropriate content. (FAC ¶24.) As a result, Plaintiff occasionally used the Laptop for personal reasons, namely to send and receive electronic messages through his personal Gmail and Facebook accounts. (FAC ¶27.) Plaintiff used his Gmail and Facebook accounts only for personal communications and not for work-related activities. (FAC ¶30.) Plaintiff never authorized Defendants to access his Gmail or Facebook accounts. (FAC ¶34.) Likewise, Plaintiff never actively saved his Gmail or Facebook passwords on the Laptop. (FAC ¶29.) Despite the foregoing, the Laptop’s web browser automatically recorded Plaintiff’s passwords for these accounts. (FAC ¶29.)

24 On February 5, 2013, Defendant EWCS D placed Plaintiff on administrative leave
25 and demanded that Plaintiff return the Laptop. (FAC ¶¶36-37.) Defendant Mary Branca,
26 ECWSD Secretary and Co-Superintendent (“Branca”), instructed EWCS D Chief Business
27 Officer, Defendant David Feliciano (“Feliciano”), to search the Laptop for inappropriate
28 content. (FAC ¶39.) Thereafter, Feliciano reviewed Plaintiff’s web browser history and

1 noticed visits to the Gmail and Facebook websites. (FAC ¶¶40-48.) While still logged
2 into the Laptop, Feliciano visited the Gmail and Facebook websites and used Plaintiff's
3 passwords to access these accounts. (FAC ¶¶29, 42-44.)

4 Once Feliciano accessed Plaintiff's Gmail and Facebook accounts, he reviewed
5 Plaintiff's personal communications. (FAC ¶45.) Feliciano printed several of Plaintiff's
6 personal emails and provided them to Branca. (FAC ¶46.) Branca instructed Feliciano
7 to continue accessing Plaintiff's Gmail and Facebook accounts over the course of several
8 months. (FAC ¶55.) As Feliciano was accessing Plaintiff's accounts, Plaintiff continued
9 to use his personal computer at home to exchange messages via these accounts. (FAC
10 ¶50.) Thus, as Plaintiff continued to send and receive personal emails, Feliciano
11 continued to monitor and intercept Plaintiff's personal communications, including email
12 exchanges between Plaintiff and his attorneys and his union representative. (FAC ¶¶50-
13 57.) As a result of Defendants' misconduct, Plaintiff has suffered, and continues to
14 suffer, extreme embarrassment, anxiety, distress, and mental anguish.

15 On September 11, 2014, Defendants filed a demurrer as to the First Amended
16 Complaint ("FAC").

17 **ARGUMENT**

18 Courts rarely entertain demurrers to privacy claims. *See Sheehan v. San*
19 *Francisco 49ers, Ltd.*, 45 Cal. 4th 992, 1003 (2009). When considering a demurrer, the
20 court must construe the plaintiff's allegations liberally, "with a view to substantial justice
21 between the parties." Code Civ. Proc. §452; *see CAMSI IV v. Hunter Tech. Corp.*, 230
22 Cal. App. 3d 1525, 1530 (1991). Privacy claims in particular require a "fact-dependent
23 weighing" of evidence not available to the court at the demurrer stage. *See Sheehan*, 45
24 Cal. 4th at 1003. To the extent there are factual issues in dispute, this court must
25 assume the truth not only of all facts properly pled, but also of those facts that may be
26 implied or inferred. *See Marshall v. Gibson, Dunn & Crutcher*, 37 Cal. App. 4th 1397,
27 1403 (1995). Thus, where the plaintiff states a claim under any possible legal theory, the
28 court must overrule the demurrer. *See Sheehan*, 45 Cal. 4th at 998; *Aubry v. Tri-City*

1 *Hospital Dist.*, 2 Cal. 4th 962, 967 (1992).

2 **A. Plaintiff has stated a claim under the Wiretap Act, where he has alleged that**
3 **Defendants intentionally acquired his electronic communications.**

4 Defendants demur to Plaintiff's claim under 18 U.S.C. §2511 (the "Wiretap Act").
5 To state a claim under the Wiretap Act, a plaintiff must allege that defendants (a)
6 intentionally (b) intercepted (c) a wire, oral, or electronic communication and thereby (d)
7 harmed the plaintiff. See 18 U.S.C. §2511. The Wiretap Act defines "intercept" as: "the
8 aural or other acquisition of the contents of any wire, electronic, or oral communication
9 through the use of any electronic, mechanical, or other device." 18 U.S.C. §2510(4).
10 The Wiretap Act also defines "electronic communication" as: "any transfer of signs,
11 signals, writing, images, sounds, data, or intelligence of any nature transmitted in whole
12 or in part by a wire, radio, electromagnetic, photo electronic or photooptical system that
13 affects interstate or foreign commerce." See 18 U.S.C. §2510(12).

14 The FAC satisfies the four elements of a Wiretap Act claim. First, Plaintiff has
15 alleged that Defendants intended to access Plaintiff's communications. (FAC ¶¶43-46,
16 50-53, 70-72.) As part of their investigation, Branca instructed Feliciano to acquire
17 Plaintiff's electronic communications over a six-month span. (FAC ¶¶54-56.) Second,
18 Plaintiff has alleged that Defendants acquired the contents of his emails through an
19 electronic device, namely the Laptop. (FAC ¶¶41-53.) Third, Plaintiff has alleged that
20 through this interception, Defendants accessed his "electronic communications," as that
21 term is defined in the Wiretap Act. See 18 U.S.C. §2510(12). Specifically, Defendants
22 accessed Plaintiff's Gmail and Facebook accounts and the electronic messages
23 exchanged by Plaintiff using these accounts. (FAC ¶¶43-53.) Fourth, Plaintiff has
24 alleged that Defendants' wrongful access harmed him. (FAC ¶59.)

25 Defendants have created an unsupported additional requirement. Defendants
26 argue that Plaintiff must also allege that Defendants accessed Plaintiff's emails while
27 they were in transit to state a claim under the Wiretap Act. This argument has no basis in
28 the text of the Wiretap Act, and cases that interpret the Wiretap Act have rejected this

1 argument. See 18 U.S.C. §2511; *U.S. v. Szymuszkiewicz*, 622 F.3d 701, 704-06 (7th
2 Cir. 2010); see also *Hall v. Earthlink Network, Inc.*, 396 F.3d 500, 503 at n.1, 505 (2d Cir.
3 2005); *U.S. v. Councilman*, 418 F.3d 67, 72-80 (1st Cir. 2005); *Zaratzian v. Abadir*, No.
4 10 CV 9049, 2014 WL 4467919, at *7-8 (S.D.N.Y. Sept. 2, 2014); *Pure Power Boot*
5 *Camp v. Warrior Fitness Boot Camp*, 587 F. Supp. 2d 548, 557 (S.D.N.Y. 2008); *Boane*
6 *v. Boane*, No. 11-2565, 2012 WL 4340838, at *1 (W.D. Tenn. Sept. 21, 2012). In *U.S. v.*
7 *Szymuszkiewicz*, for example, the Seventh Circuit rejected an argument identical to
8 Defendants’ argument here—*i.e.*, that the Wiretap Act has an “in transit” requirement.
9 *Szymuszkiewicz*, 622 F.3d at 704-06. Judge Easterbrook held that the Wiretap Act
10 applies wherever the defendant intercepts a plaintiff’s electronic communication,
11 including after the message has arrived. *Id.* at 705-06. Specifically, Judge Easterbrook
12 explained that when defendants accessed the email “no more than an eyeblink” later
13 than it arrived, such an acquisition was an interception. *Id.* at 706.

14 Courts in other circuits have reached the same conclusion, many citing Judge
15 Easterbrook’s decision. See *Hall*, 396 F.3d at 504; *Councilman*, 418 F.3d 67, 72-80;
16 *Zaratzian*, 2014 WL 4467919 at *7-8; *Pure Power Boot Camp*, 587 F. Supp. 2d at 557;
17 *Boane*, 2012 WL 4340838 at *1. In *Hall*, the Second Circuit refused to impose an in-
18 transit requirement, finding that contemporaneous access to the contents of an email not
19 in-transit satisfies the Wiretap Act. See *Hall*, 396 F.3d at 504 n.1, 505. Later decisions
20 reaffirm the Second Circuit’s analysis in *Hall*. See *e.g.*, *Pure Power Boot Camp*, 587 F.
21 Supp. 2d at 557 (citing *Hall*’s rejection of in-transit requirement under the Wiretap Act).
22 Similarly, in *U.S. v. Councilman*, the First Circuit analyzed the legislative history of the
23 Wiretap Act and rejected the defendants’ interpretation that included an in-transit
24 requirement. See *Councilman*, 418 F.3d at 72-80. In so holding, the First Circuit ruled
25 that the legislative purpose of the Wiretap Act “was to enlarge privacy protections for
26 stored data under the Wiretap Act, not to exclude e-mail messages stored during
27 transmission from those strong protections.” See *id.* at 74.

28 Defendants rely on *Konop* and its progeny to argue for an in-transit requirement.

1 See *Konop v. Hawaiian Airlines, Inc.*, 302 F.3d 868 (9th Cir. 2002); *Bunnell v. Motion*
2 *Picture Ass'n of Am.*, 567 F. Supp. 2d 1148 (C.D. Cal. 2007). However, *Konop* does not
3 set forth an in-transit requirement. See *Konop*, 302 F.3d at 876-77. In *Konop*, the Ninth
4 Circuit defined “interception” to require contemporaneous access, not in-transit access.
5 See *id.* As Judge Easterbrook explained, contemporaneous acquisition is different from
6 in-transit acquisition. See *id.* This distinction is of critical importance. Between the time
7 an email is sent and the time of receipt, the email itself only exists as bits of data, and the
8 bits do not travel together in lock step. See *Szymuszkiewicz*, 622 F.3d at 705-06. The
9 contents of an email navigate networks in packets, which are “small digital envelopes of
10 data,” and separate envelopes can take separate paths. See P.W. Singer and A.
11 Friedman, *CYBERSECURITY AND CYBERWAR: WHAT EVERYONE NEEDS TO KNOW* 17 (2014).
12 Prior to transmission, the computer divides the email into several packets. See *id.* at 17-
13 24. The computer then directs each packet to move across a network of pathways to the
14 recipient. See *id.* Only at the recipient’s computer, after each of the packets has
15 navigated from one computer to the other, are the packets reassembled into a single
16 digital file, an email. See *id.* For this reason, Judge Easterbrook explained: “for email
17 there is no single ‘thing’ that flies straight from sender to recipient.” See
18 *Szymuszkiewicz*, 622 F.3d at 705; see also *Zaratzian*, 2014 WL 4467919 at *7 (“The
19 Court agrees with the Seventh Circuit’s commonsense application of the
20 contemporaneity requirement.”).

21 Thus, Defendants’ in-transit requirement makes little sense, because there is no
22 such thing as an email in transit. The FAC alleges that Defendants engaged in
23 contemporaneous access to Plaintiff’s email by continuously monitoring his account.
24 (FAC ¶¶47-48.) As a result, Plaintiff has stated a claim under the Wiretap Act.

25 **B. Plaintiff has stated a claim for intrusion upon seclusion by alleging that**
26 **Defendants invaded his objectively reasonable expectation of privacy.**

27 To state a claim for intrusion upon seclusion, a plaintiff must allege (a) the
28 defendant intentionally intruded upon a zone subject to an objectively reasonable

1 expectation of privacy; and (b) the intrusion would be highly offensive to a reasonable
2 person. See *Shulman v. Grp. W Prods., Inc.*, 18 Cal. 4th 200, 231 (1998). Whether a
3 plaintiff had a reasonable expectation of privacy under the circumstances, and whether a
4 defendant's conduct constitutes a serious invasion of privacy are mixed questions of law
5 and fact. See *Hill v. Nat'l College Athletic Assn.*, 7 Cal. 4th 1, 29 (1994). The factfinder
6 must evaluate the evidence about the circumstances surrounding Plaintiff's expectation
7 of privacy and the offensiveness of the Defendants' conduct. See *Miller v. Nat'l Broad.*
8 *Co.*, 187 Cal. App. 3d 1463, 1483-84 (1986) (ruling based on evidence regarding context,
9 conduct, and circumstances surrounding intrusion, the intruder's motives and objectives,
10 and the setting of defendant's intrusion).

11 Claims for intrusion upon seclusion extend to the workplace, and in the particular,
12 personal emails sent from a workplace computer. See *Mintz v. Mark Bartelstein and*
13 *Associates Inc.*, 906 F. Supp. 2d 1017, 1033-34 (C.D. Cal. 2012) (plaintiff had
14 reasonable expectation of privacy in personal emails, where personal account was
15 password protected at all times, and plaintiff never authorized access by employer or
16 fellow employees); *Doe v. City & Cnty. of San Francisco*, No. C10-4700 TEH, 2012 WL
17 2132398 at *4-5 (N.D. Cal. June 12, 2012) (plaintiff's intrusion upon seclusion claim
18 proceeded to jury trial based on evidence that employer searched her personal email
19 address).

20 Plaintiff has alleged sufficient facts to state a claim for intrusion upon seclusion.
21 First, Plaintiff has alleged that Defendants violated an objectively reasonable expectation
22 of privacy, by acquiring Plaintiff's personal emails without Plaintiff's knowledge,
23 authorization, or consent. (FAC ¶¶28, 30-31, 33-34, 43, 45.) Second, Plaintiff has
24 alleged that Defendants' intrusion would be highly offensive to a reasonable person,
25 where Defendants read and copied Plaintiff's most sensitive emails to his attorneys,
26 friends and family, and union representative. (FAC ¶¶46, 51-53.) The offensiveness of
27 Defendants' conduct is further evidenced by Defendants' continuous access, occurring
28 numerous times over the span of six months. (FAC ¶¶47-48.) Finally, Defendants

1 disclosed copies of Plaintiff's private emails to others, including Defendant EWCSA's
2 attorneys. (FAC ¶55.)

3 Defendants argue that expectations of privacy are *per se* reduced on work
4 computers. This argument fails. See *Doe v. City & Cnty. of San Francisco*, 2012 WL
5 2132398, at *5. In *Doe*, the defendants accessed an employee's email, directed to a
6 union steward regarding workplace conditions. See *id.* at *4-5. The court rejected an
7 argument identical to Defendants' argument here, because questions of fact existed
8 about workplace privacy norms. See *id.* Defendants rely upon *TBG Ins. Servs. Corp. v.*
9 *Superior Court*, 96 Cal. App. 4th 443 (2002). However, *TBG* did not address a claim for
10 intrusion upon seclusion. See *id.* at 449-55. Rather, in *TBG*, the plaintiff put the
11 contents of his work computer at issue by litigating a claim for wrongful termination. See
12 *id.* at 449-55. The court held that the defendants were entitled to compel production of a
13 work computer as part of discovery and pursuant to an e-discovery protective order
14 excluding non-relevant content. See *id.* at 454; Code Civ. Proc. §2031(g).

15 Even if Plaintiff's work computer itself were subject to a diminished expectation of
16 privacy, Defendants did not merely acquire work emails or files stored on the Laptop.
17 Defendants accessed substantially all of Plaintiff's personal communications over a six
18 month span, without limit, including those sent and received from Plaintiff's home, using
19 his own mobile devices. (FAC ¶¶56-57.) Defendants' sole point of access was the
20 Laptop, which recorded Plaintiff's passwords by default, not because Plaintiff authorized
21 Defendants to access his personal email accounts. (FAC ¶¶29, 30-34, 43-45.)
22 Moreover, Defendants did not notify Plaintiff of their ongoing access to his accounts.
23 (FAC ¶49.) Significantly, Defendants' stock Acceptable Use Policy in no way
24 contemplated access to employees' personal accounts, let alone by secretive use of their
25 private passwords. (FAC ¶¶24-25.) For these reasons, Defendants' monitoring of
26 Plaintiff's personal emails was uniquely invasive, extending beyond any reasonable
27 monitoring of workplace conduct.

28 In essence, Defendants ask this Court to establish a reduced expectation of

1 privacy where none exists. Defendants challenge the very privacy interests validated by
2 the Supreme Court of the United States just months ago. Specifically, without Plaintiff's
3 consent, Defendants used Plaintiff's username and password to access a personal
4 account that "hold[s] for many Americans 'the privacies of life.'" See *Riley v. California*,
5 134 S. Ct. 2473, 2490-91 (2014) (validating privacy interests in internet browsing history
6 and mobile application data that could reveal disease symptoms, political affiliations,
7 addictions, romantic endeavors, and commercial exchanges, among other categories of
8 sensitive information). Based on this precedent, this Court should reject Defendants'
9 argument wholesale.

10 **C. Plaintiff has stated a claim under Penal Code section 502, because he has**
11 **alleged that Defendants' access to his data was "without permission."**

12 Defendants demur to Plaintiff's claim under California Penal Code section 502
13 ("Section 502"). Section 502 codifies seven different private causes of action, at least
14 four of which are actionable under the facts Plaintiff has alleged in the FAC. See Cal.
15 Penal Code §§502(c)(1), (2), (3), (7), *et seq.* Defendants only demur to Plaintiff's claim
16 under section 502(c)(2), leaving the remaining claims unchallenged. A plaintiff states a
17 claim under section 502(c)(2), where the plaintiff alleges that a defendant (1) knowingly
18 (2) accessed and used data (3) taken from a "computer" (4) without permission. See Cal.
19 Penal Code §502(c)(2).

20 Plaintiff has alleged sufficient facts to state a claim under section 502(c)(2). First,
21 Defendants accessed Plaintiff's personal communications, and such access was willful.
22 Branca instructed Feliciano to acquire Plaintiff's electronic communications, and
23 Feliciano accessed Plaintiff's accounts on multiple occasions to do so. (FAC ¶¶50-59.)
24 Second, Defendants accessed and used Plaintiff's data. Defendants acquired the
25 contents of Plaintiff's emails, made copies, and relayed those copies to third parties.
26 (FAC ¶¶43-46, 50-53.) Third, Defendants obtained this data from computers.
27 Defendants used the Laptop to access Plaintiff's Gmail and Facebook accounts, which
28 are operated via networks and systems owned by Google and Facebook. (FAC ¶¶28, 41-

1 42.) No other device in Defendants' possession recorded Plaintiff's login credentials,
2 and Plaintiff's personal emails were not stored on the Laptop. (FAC ¶¶28.) Fourth,
3 Plaintiff did not permit Defendants to access or use his data. (FAC ¶¶30, 33-34.)

4 Defendants ask this Court to read-in additional requirements that do not appear in
5 Section 502. Defendants argue that Plaintiff must allege that Defendants circumvented a
6 "technical barrier." However, the phrase "technical barrier" does not appear in the text of
7 Section 502 or in the relevant jurisprudence. See Cal. Penal Code §§502(c)(1), (2), (3),
8 (7), *et seq.* Thus, in *Facebook, Inc. v. Power Ventures*, the court held that the presence
9 of a technical barrier was not dispositive of a section 502(c)(2) claim. No. 08-05780 JW,
10 2010 WL 3291750, at *10-12 (N.D. Cal. July 20, 2010). While the *Power Ventures* court
11 noted that the plaintiff used a sophisticated method to block the defendant, the relevance
12 of such "technical barriers" was one of the many factors relevant to the fourth element of
13 section 502(c)(2): whether access was "without permission." See *id.* Here, the FAC
14 clearly alleges Defendants' access was "without permission." (FAC ¶¶31-34.) Nothing
15 more is required. See Cal. Penal Code §502(c)(2).

16 Even if section 502(c)(2) did require a technical barrier, Defendants' argument
17 would fail. Defendants argue that Plaintiff's password does not satisfy the "technical
18 barrier" element, because the Laptop stored Plaintiff's password. Defendants' argument
19 conflates the lock with the key. A "technical barrier" is defined as a "code-based barrier[]
20 that a computer network or website administrator erects to restrict the user's privileges
21 within the system, or to bar the user from the system altogether." See *Power Ventures*.
22 at *11. Gmail and Facebook accounts are indeed locked with code-based barriers that
23 require a password and otherwise restrict all access. Here, Defendants misused
24 Plaintiff's passwords without his permission to circumvent these barriers. See *Power*
25 *Ventures* at *11.

26 Even assuming for the purposes of this demurrer that Defendant's argument
27 forecloses a claim under section 502(c)(2), the FAC also asserts claims under section
28 502(c), subsections (1), (3), and (7). These subsections prohibit:

- 1 • Cal. Penal Code §502(c)(1): (1) knowingly (2) accessing and (3) without
2 permission (4) using (5) any computer, computer system, or computer network in
3 order to (6) wrongfully control or obtain data.
- 4 • Cal. Penal Code §502(c)(3): (1) knowingly and (2) without permission (3) using (4)
5 “computer services.”
- 6 • Cal. Penal Code §502(c)(7): (1) knowingly and without permission (2) accessing
7 (3) any “computer,” “computer system,” or “computer network.”

8 Plaintiff has alleged facts that establish claims under each of these subsections. *See id.*
9 Satisfying subsection (c)(1), Plaintiff has alleged that Defendants knowingly accessed
10 and without permission used computers to wrongfully control and obtain data containing
11 Plaintiff’s personal communications. (FAC ¶¶28-59, 88, 90, 92.) Satisfying subsection
12 (c)(3), Plaintiff has alleged that Defendants knowingly and without permission used the
13 “computer services” of Google and Facebook to access Plaintiff’s accounts on both of
14 those services. (FAC ¶¶28-59, 91, 94.) Satisfying subsection (c)(7), Plaintiff has alleged
15 that Defendants accessed computers, computer networks, computer services, and
16 computer systems that operated Plaintiff’s Gmail and Facebook accounts. (FAC ¶¶28-59,
17 91, 95.)

18 **D. Plaintiff has stated a claim under the California Invasion of Privacy Act,**
19 **where he has alleged an unauthorized connection via email.**

20 To state a claim under the California Invasion of Privacy Act (“CIPA”), Cal. Penal
21 Code §631, a plaintiff can allege that defendants (a) by means of any machine,
22 instrument, or contrivance, or in any other manner (b) intentionally (c) tapped or made an
23 unauthorized connection whether physically or otherwise, (d) with any telegraph or
24 telephone wire, line, cable, or instrument. *See* Cal. Penal Code 631. Alternatively, a
25 plaintiff can allege that a defendant either read contents of a communication sent from, or
26 received in, California; or a plaintiff can allege that a defendant used information from
27 communications sent from or received in California. *See id.*

28 Plaintiff has stated a claim under CIPA. First, Plaintiff has alleged that Defendants

1 used the Laptop to make an unauthorized connection, by accessing Plaintiff's Gmail and
2 Facebook accounts. (FAC ¶¶28, 43-46, 50-53, 70-72.) Second, Plaintiff has alleged that
3 Defendants' conduct was intentional, as evidenced by Defendants' repeated instances of
4 the same misconduct, including multiple unauthorized connections over a six month
5 span. (FAC ¶¶43-46, 50-53, 70-72.) Third, Plaintiff has alleged that he never authorized
6 Defendants to access data in his Gmail and Facebook accounts. (FAC ¶¶31-34.)
7 Finally, Plaintiff has alleged that Defendants used the Laptop and an internet connection
8 to access Plaintiff's accounts. (FAC ¶¶43-46.) Plaintiff has also stated a claim under
9 CIPA because Plaintiff has alleged that Defendants read the contents of Plaintiff's private
10 communications, which were sent from and/or received in California. (FAC ¶¶50-57.)

11 Defendants contend that email privacy is not recognized by CIPA, claiming that no
12 CIPA precedent applies to email. This argument is easily disproved. *See In re Yahoo*
13 *Mail Litig.*, 7 F.Supp.3d 1016, 1036, (N.D. Cal. 2014) (defendant's motion to dismiss
14 denied as to CIPA claims). Moreover, Defendants misread relevant case law. The
15 Supreme Court of California has long established that CIPA's application extends beyond
16 telegraphs and telephone. *See People v. Trieber*, 28 Cal. 2d. 657, 663-64 (1946). The
17 statute expressly applies to "other" technologies. *See* Cal. Penal Code §631. CIPA
18 applies where the contents of a communication received in California are accessed,
19 without authorization, through "any instrument of any variety." *See People v. Trieber*, 28
20 Cal. 2d. at 663-64. There is thus no dispute that the emails at issue were sent over
21 telephone wires, lines, cables, or other instruments and therefore subject to CIPA.

CONCLUSION

For the foregoing reasons, Plaintiff respectfully requests that the Court overrule Defendants' demurrer as to the FAC.

Respectfully Submitted,

DATED: November 24, 2014

KRONENBERGER ROSENFELD, LLP
