REINTERPRETING THE APPARENT FAILURE OF THE PRESIDENTIAL RECORDS ACT AND THE NECESSITY OF EXECUTIVE ORDER 13,233: DENYING HISTORIANS ACCESS OR PROTECTING THE PRA?

Erik Paul Khoobyarian*

I. INTRODUCTION

Presidents since George Washington have sought to protect certain information from the hands of Congress and others. Executive privilege exists as a powerful tool, used by the President to guard such information. The import of executive privilege has manifested itself in a variety of ways resulting in questions of separation of powers and presidential immunity. The Constitution of the United States is silent on many of these issues. More importantly, Congress historically maintained its

* Senior Technical Editor, Santa Clara Law Review, Volume 43. J.D. candidate, Santa Clara University School of Law; B.A., American University.

1. This struggle is not the focus of this comment. It is important, however, to recognize that there is historical context to the concept that certain deliberations should be conducted in a candid fashion in order to reach results which could otherwise not be reached without confidential proceedings. See United States v. Nixon, 418 U.S. 683, 706 (1964) ("[t]he President's need for complete candor and objectivity from advisors calls for great deference from the courts . . . ."). This is not to say that this fact alone is sufficient to warrant that presidential secrets should all be preserved. See generally Dorsen and Shattuck, Executive Privilege, the Congress and the Courts, 35 OHIO ST. L.J. 1, 23 (1974) (providing background and history on the use of executive privilege).

2. See id.

3. See Dorsen and Shattuck, supra note 1 (explaining that the concept of separation of powers has evolved from the original structure of the Constitution and the intent of the Framers; executive privilege has been borne out of this concept). See also Hearing on the Implementation and Effectiveness of the Presidential Records Act of 1978 Before the Subcomm. on Gov't Efficiency, Fin. Mgmt., and Intergovernmental Relations, of the Comm. on Gov't Reform, 107th Cong. 40-62, at 42 (2002) [hereinafter Hearings] (prepared statement of Mark J. Rozell, Professor of Politics, Catholic University of America) ("Executive privilege is an implied power derived from Article II. It is most easily defined as the right of the President and high-level Executive branch officers to withhold information from those who have
power by refusing to buttress Executive claims of immunity from congressional interference.\(^4\) Ultimately, the Supreme Court stepped forward and gave the President the power to invoke the executive privilege.\(^5\) However, this decision raised new concerns as to whether the judiciary was empowered to make such a decision and from where that power originated.\(^6\) The separation of powers inherent in the Constitution has produced a body of constitutional law that makes it difficult for the layman to understand what information the President can and cannot keep from congressional reach under the executive privilege.\(^7\) Consequently, the duration and scope of the executive privilege sets the stage for this comment's focus on the release of presidential records.\(^8\)

In response to pending litigation\(^9\) and Executive Order 13,233\(^10\) of November 1, 2001, this comment addresses the current status of the Presidential Records Act (PRA)\(^11\). Part II of this comment first presents the history of presidential documents resulting in the passage of the Presidential Records Act in 1978.\(^12\) Next, it outlines the PRA and its effect on the dissemination of presidential records.\(^13\) This section also discusses Executive Order 12,667\(^14\) (Reagan Order) issued at the close of President Ronald Reagan's term, which outlined the implementation of the PRA.\(^15\) Further, it addresses

interpretation of the PRA under Executive Order 13,233\textsuperscript{16} (Bush Order)\textsuperscript{17} and subsequent opposition to the Executive Order.\textsuperscript{18} Part III of this comment presents the legal problem with the PRA, resulting from the interpretations and implementations of the Reagan and Bush Orders.\textsuperscript{19} Part IV of this comment analyzes the implementation of the PRA from the Reagan Order to the Bush Order, and the feasibility of appropriate interpretation of the PRA as Congress drafted it in 1978.\textsuperscript{20} With the introduction of legislation in 2002, this section also questions whether Congress has the legislative power to more thoroughly govern the President's use of executive privilege. Finally, Part V proposes that the Bush Order is the best way to implement the PRA.\textsuperscript{21}

II. BACKGROUND

A. Presidential Records Act (PRA)

1. Pre-Nixon

Prior to the enactment of the 1978 Presidential Records Act (PRA),\textsuperscript{22} the President had control of his own documents both before and after his presidency.\textsuperscript{23} This rule enabled the President to take all records of deliberations that took place while in office, presumably to the grave.\textsuperscript{24} The PRA limited access to these documents by people other than the President's designees to situations involving subpoenas for legitimate court-approved reasons. Eventual release was at the discretion of the President.\textsuperscript{25}

Under the PRA, several Presidents released some of their materials that were then held by the presidential libraries.\textsuperscript{26} The presidential libraries maintain the materials of former Presidents

\textsuperscript{16. Bush Order, supra note 10.}
\textsuperscript{17. See infra Part II.C.}
\textsuperscript{18. See infra Part II.D.}
\textsuperscript{19. See infra Part III.}
\textsuperscript{20. See infra Part IV.}
\textsuperscript{21. See infra Part V.}
\textsuperscript{23. See supra note 1.}
\textsuperscript{24. See supra note 1.}
\textsuperscript{25. See supra note 1.}
\textsuperscript{26. See Hearings, supra note 3, at 11-22 (prepared statement of John W. Carlin, Archivist of the United States).}
Hoover, Roosevelt, Truman, Eisenhower, Kennedy, Johnson, Ford, and Carter. These libraries operate according to the terms of the deeds of gift drafted by the former Presidents when they donated their materials to the National Archives.

The former Presidents deeded their respective materials to the National Archives with certain provisions. According to John W. Carlin, Archivist of the United States, "[e]ach of these deeds has provisions outlining categories of records that may be withheld from public access for some period of time." These provisions are intended to prevent disclosure of information that could "harm national security, invade personal privacy, or cause embarrassment or harassment."

Prior to the PRA, the director of each Presidential Library maintained the materials of the former Presidents. The National Archives and Records Administration (NARA), in consultation with the former President, appointed these directors. According to Carlin, "[l]iving former Presidents in some cases would establish priorities for the processing of particular subjects or series of records." Other than these priorities for processing of documents established by the Presidents before providing them to NARA, once released to NARA, the former President gave up control of the documents. Furthermore, most former Presidents released the vast majority of their documents, thereby subjecting them to the scrutiny of the general public.

Typically, the Freedom of Information Act (FOIA) governs the release of government documents. The FOIA sets a timetable for the release of government documents at the request of the public as well as requirements for the reporting of statistics relating to rates of request and the number of requests

that are honored. Presidential documents deeded to NARA are not subject to the same disclosure requirements as the FOIA, because they are not deemed government documents, but rather considered collectively as a gift to NARA. As a result of the exemption from the FOIA, directors' collection of documents at presidential libraries is much quicker than typical FOIA requests. However, historians and researchers have no legal recourse for materials that are not released. They would have these rights under the FOIA.

The concept of exempting presidential documents from the FOIA was essential to the Act, as passage of the FOIA was contingent upon it. The FOIA was never intended to cover presidential documents. In fact, it was not until the Watergate scandal that questions regarding presidential immunity and executive privilege came to the forefront of discussions of preservation of documents.

2. President Nixon and the Presidential Recordings and Materials Preservation Act (PRMPA)

In order to ensure government control of the Nixon papers and tapes, Congress passed the Presidential Recordings and Materials Preservation Act (PRMPA) in 1974. The PRMPA effectively opened the door to the question as to when the federal government would take ownership of presidential documents. Federal ownership of presidential documents would result in their inclusion under FOIA, meaning denied requests for documents by individuals would be open to judicial review. Although the PRMPA was specifically geared towards the Watergate materials, it resulted in the formation of

48. See id. at 15.
49. See id.
committees that ultimately resulted in the drafting of the PRA in 1978, four years after passage of the PRMPA.50

The PRMPA established the National Study Commission on Records and Documents of Federal Officials.51 The PRMPA charged the commission with studying "whether the historical practice regarding the records and documents produced by or on behalf of Presidents of the United States should be rejected or accepted and whether such practice should be made applicable with respect to all federal officials."52 The commission produced its 1977 report, which Congress used during the formation of the PRA.53

3. PRA Enactment

The Presidential Records Act, passed in 1978, directs the Archivist of the United States to administer presidential records as they would FOIA requests.54 There are several exceptions to the FOIA distributions related to the timeframe for the release of documents.55 Presidential records are not released during the President’s term of office, and are only released under the authorization of the incumbent President after five years have elapsed.56 Furthermore, under the PRA a President may restrict access for up to twelve years to any of his records that fall within six specified categories.57 These six categories, roughly distilled, include: national defense, appointments to federal office, statutorily exempted materials,58 trade secrets, confidential communications,59 and personnel and medical files.60

50. See id. at 15-16.
51. See id. at 15.
52. Id. at 15 (citing Pub. L. No. 93-526, 88 Stat. 1695).
54. 44 U.S.C. § 2204(c).
55. See id. § 2204(a). Typically records requested under the FOIA are immediately available to the public. See id.
57. See Hearings, supra note 3, at 65-77 (prepared statement of Peter M. Shane, professor, University of Pittsburgh and Carnegie Mellon University).
58. 44 U.S.C. § 2204(a)(3) ("[S]pecifically exempted from disclosure by statute . . . provided that such statute requires the material to be withheld from the public in such a manner as to leave no discretion on the issue, or . . . establishes particular criteria for withholding or refers to particular types of material to be withheld.").
59. See id. § 2204(a)(5) (explaining that such communications are those "between the President and his advisors, or between such advisors").
"This structure... leaves certain important questions unanswered. Those questions exist in part because, in providing for a staged release of records from past Presidents, the Act is also explicit in leaving untouched "any constitutionally-based privilege which [sic] may be available to an incumbent or former President." Such privileges must be identified before the President leaves office and they are not subject to judicial review.

The Archivist of the United States is responsible for "the custody, control, and preservation of, and access to, the Presidential records of th[e former] President." Under the PRA, the NARA has taken control of the presidential records of Presidents Ronald Reagan, George H.W. Bush, and William J. Clinton. The PRA mandates that the Archivist must "make [the presidential] records available to the public as rapidly and completely as possible consistent with the provisions of the Act."

The House report accompanying the PRA states:

The legislation would terminate the tradition of private ownership of Presidential papers and the reliance on volunteerism to determine the fate of their disposition. Instead, the preservation of the historical record of future Presidencies would be assured and public access to the materials would be consistent under standards fixed in law. The primary function of the Presidential libraries remains unchanged. The libraries are to continue to provide information about their holdings and to make records available to researchers upon request on an impartial basis.

Under the PRA all the presidential records of an administration are transferred "to the legal and physical custody of [NARA] immediately upon the end of the President’s last term of office." The PRA is a significant change from the treatment of

---

60. See id. § 2204(a)(6).
64. See Hearings, supra note 3, at 12 (prepared statement of John W. Carlin, Archivist of the United States).
Presidential documents for the 200 years, and represents a codification of the practice of Presidents who voluntarily handed their documents over to the federal government through their libraries. The House Report on the PRA states that "[i]t is anticipated that the Archivist will process the former administration's papers in a manner roughly similar to current practices."

The PRA gives some degree of flexibility in its application to the Archivist and the NARA. The President also may waive certain restrictions or shorten the length of restricted access. The Archivist's freedom to negotiate with the former President is important to ensure that the former President's interests are considered regarding the distribution of documents. The PRA does not take away the President's power to exercise executive privilege after he leaves office. Had the PRA taken that power away, it would have been preempted by the Supreme Court. However, the President must decide before leaving office how he will use the restrictions and for which documents he will invoke the privilege. The authority for the determination of what documents are to be released ultimately rests, however, in the Archivist.

Congress intended that the PRA would further allow the

68. See id. See also supra Part II.A.1-2.
70. See Hearings, supra note 3, at 13-14, 17 (prepared statement of John W. Carlin, Archivist of the United States).
71. See id. at 16-18.
72. See id. at 13-14.
73. See id. at 17.
74. See Nixon v. Adm'r of Gen. Servs., 433 U.S. 425, 449 (1977) (holding that constitutionally based privileges available to a President survive the President's term).
75. See Hearings, supra note 3, at 17-19 (prepared statement of John W. Carlin, Archivist of the United States). When the President hands his documents over to the Archivist, the President must designate which records he intends to protect under the executive privilege. See id. These can be broad categories of documents and the President will ultimately need to decide, most likely after leaving office, whether to invoke the privilege with regard to these specific documents. See id. The President does not need to make this decision when leaving office, and retains the right to make the decision after they are no longer in office. See id. To do otherwise would violate the Supreme Court position that the privilege survives the President's term. See id.; Adm'r of Gen. Servs., 433 U.S. at 449.
76. See Hearings, supra note 3, at 16-19 (prepared statement of John W. Carlin, Archivist of the United States) (with the exception relating to Presidential restrictions that preserves the President's ability to prevent certain documents from being released by the Archivist).
Archivist to control the documents in a manner consistent with previous practice. The rights of the former President are held by the incumbent President in that the incumbent President may exercise the executive privilege to block the release of certain documents. The PRA states that "[n]othing in this Act shall be construed to confirm, limit, or expand any constitutionally-based privilege which may be available to an incumbent or former President."

Like much legislation, the PRA gives the President the responsibility to interpret and implement the law. Although the guidelines for implementation are found in the statute, the PRA never spelled out the interplay between the incumbent President, the former President, and the NARA.

B. Executive Order 12,667 (Reagan Order)

Two days before leaving office in 1989, President Ronald Reagan issued Executive Order 12,667 entitled the "Presidential Records" order (Reagan Order). The introduction to the Reagan Order states that it was enacted "in order to establish policies and procedures governing the assertion of executive privilege by incumbent and former Presidents in connection with the release of Presidential records by [NARA] pursuant to the [PRA] of 1978."

The Reagan Order establishes a method for the release of

77. See id. at 17.
Moreover, in the legislative history, Congress anticipated that the Archivist [would negotiate the Presidential restrictions with the former President]: "It is also expected that the Archivist will follow past practice in applying the restrictive categories to former Presidents' deeds of gift, and negotiate with the ex-President or his representative on an on-going basis to lessen the number of years chosen for particular mandatory restriction categories, to eliminate entire categories, or to permit release of particular records otherwise restricted."

80. See generally Hearings, supra note 3 (prepared statement of John W. Carlin, Archivist of the United States).

82. See generally Hearings, supra note 3 (prepared statement of John W. Carlin, Archivist of the United States) (specifically, the role of the directors of the Presidential libraries and the Archives Director are not included in the PRA).

84. Id.
Presidential records covered under the PRA.85 Significantly, President Reagan was the first President whose records were subject to the PRA.86 More than nine years after passage of the PRA, and on the eve of its implementation, the Reagan Order was enacted, outlining how requests under the PRA would fit into NARA’s information dissemination process.87

The Reagan Order requires the Archivist to notify the incumbent President and the former President when he receives notification of a request that may raise a question of executive privilege.88 The Reagan Order instructs the Archivist to use his discretion, requiring him to identify materials which “he believes may raise a substantial question of Executive privilege.”89 However, if the Archivist does not identify documents as being potentially protected under executive privilege, the incumbent and former Presidents retain their respective right to exercise executive privilege for appropriate subject matter.90 The former President and the incumbent President then have thirty days to invoke executive privilege before the Archivist is directed to release the documents.91

1. Claim of Executive Privilege by Incumbent President

The Reagan Order directs the Attorney General and the incumbent President to coordinate with other Federal Agencies to determine whether “invocation of Executive privilege is justified.”92 The Attorney General and the Counsel to the President may determine that it is not appropriate to invoke executive privilege, in which case they must notify the Archivist “promptly . . . of any such determination.”93 If after consultation with the Attorney General and the Counsel to the President, the incumbent President decides to invoke executive privilege with regard to the records, the former President and the Archivist are notified.94 The “Archivist shall not disclose the privileged

records unless directed to do so by an incumbent President or by a final court order.  

2. Claim of Executive Privilege by Former President

When a former President claims executive privilege, the Archivist consults with the Attorney General and other Federal agencies to determine whether to disclose the records, or to honor the former President’s claim of privilege. The Archivist makes his determination regarding the disclosure of the documents according to the incumbent President’s instructions. Once the Archivist makes his determination, he notifies the incumbent President and the former President that the documents are to be released.

C. Executive Order 13,233 (Bush Order)

January 18, 2001, marked twelve years since President Reagan left office. This twelve-year point was significant because, even under the Reagan Order, the incumbent President had only thirty days to invoke executive privilege with regard to any of former President Reagan’s records. The Reagan Order specified that the incumbent President must notify the Archivist “in writing of the claim of privilege and the specific Presidential records to which it relates.” President George W. Bush received several requests for roughly 68,000 pages of documents that had been withheld for the twelve years since the end of the last Reagan term. Although the PRA had been signed into law more than twenty years earlier, these records would be the first released under its mandate. Furthermore, these requests

95. Id. § 3(d).
96. See id. § 4(a).
97. See id. § 4(b).
98. See id.
100. Reagan Order, supra note 14, § 3(d) (emphasis added).
102. See id. at 446-48. It is important to note, however, that the government-ownership of documents became ordinary under the FOIA and that release of records to the public had been taking place for some time. Furthermore, the Nixon records were both the motivation and the model for further release of Presidential
would be the first time that privileged documents would be released—setting a precedent for further release of Presidential records under the PRA.103

1. Constitutional and Legal Background for the Bush Order

Prior to leaving office, the former President and the incumbent President have the ability to limit access to records.106 These limits last for twelve years under the PRA.107 After that period, the PRA requires the Archivist to use the FOIA as the guide for administering Presidential records.108 “Section 2204(c)(2) recognizes that the former President or the incumbent President may assert any constitutionally based privileges, including those ordinarily encompassed within exemption (b)(5) of section 552.”109

According to the Bush Order, the Executive exercise of constitutionally-based privilege cannot cease solely due to the passage of time, without regard to the incumbent President’s ability to discern the timeliness of the release of records.110 The Bush Order relies upon the Supreme Court holding in Nixon v. Administrator of General Services111 that “[u]nless [the President] can give his advisors some assurance of confidentiality, a President could not expect to receive the full and frank submissions of facts and opinions upon which effective discharge of his duties depends.”112

records. See id.
103. See Hearings, supra note 3, at 34 (prepared statement of Anna K. Nelson, Distinguished Adjunct Historian in Residence, American University).
105. See id. § 13.
106. See supra notes 53-63 and accompanying text.
109. Id. (referring to the PRA which limits the use of exemptions under the FOIA, noting also that even with the exemption, the President retains their privileges after they leave office).
110. See id.
112. Bush Order, supra note 10, § 2 (quoting 433 U.S. at 448-49) (internal quotations omitted).
The Bush Order also relies on the Supreme Court ruling in *United States v. Nixon*,¹¹³ which "held that a party seeking to overcome the constitutionally based privileges that apply to Presidential records must establish at least a 'demonstrated, specific need' for particular records, a standard that turns on the nature of the proceedings and the importance of the information to that proceeding."¹¹⁴ Additionally, the Bush Order notes that although Presidents have had this ability to exercise executive privilege, they have still historically chosen to release their records in due time.¹¹⁵ Although Presidents have frequently exercised the privilege in the past, after "appropriate period[s] of repose" most have ultimately "decided to authorize access."¹¹⁶

2. Procedure for Administering Privileged Presidential Records

Under the Bush Order

The Bush Order profoundly changes the procedures for administering privileged presidential records,¹¹⁷ while maintaining several steps from the Reagan Order.¹¹⁸ After the Archivist receives the request for access to Presidential records, the Archivist notifies the former President and the incumbent President.¹¹⁹ The Archivist provides both Presidents with the requested records,¹²⁰ and he may not release the records while the former President reviews them.¹²¹

The incumbent President concurrently has the ability to determine whether to invoke executive privilege with regard to the records.¹²² If the former President has requested withholding of the records and "the incumbent President concurs in the former President's decision to request withholding of records as privileged, the incumbent President shall inform the former President and the Archivist."¹²³ The Archivist may not permit access to the records until the

117. See id. § 3.
118. Compare id. with Reagan Order, supra note 14, § 3(d).
119. See id.
120. See Bush Order, supra note 10, § 3(a).
121. See id. § 3(b) ("The Archivist shall not permit access to the records by a requester during this period of review or when requested by the former President to extend the time of review.").
122. See id. § 3(d).
123. Id. § 3(d)(1)(i).
incumbent President informs them that both he and the former
President agree to authorize access "or until so ordered by a
final and nonappealable court order."124

The Bush Order uses section 2204(c)(2) of title 44 to invoke
the executive privilege that exists outside of the PRA.125 By
invoking the Supreme Court guarantee of Presidential privilege
beyond the term of office, the Bush Order effectively enables
Presidents to block the release of records indefinitely.126 The
Bush Order has caused significant discussion because the
current requests for the Reagan records are the first under the
PRA and thus will set precedent for the release of future
presidential records.127

D. Opposition to The Bush Order

When the Bush Order was released to the press on
November 1, 2001, they immediately questioned the President’s
motive and the effect that the Bush Order would have on the
PRA.128 Less than one month after the Bush Order was released,
several groups and individuals filed a complaint (Complaint) in
the United States District Court for the District of Columbia.129
The plaintiffs in the case ranged from history professors130 to

124. Id.
125. See supra notes 110-116 and accompanying text.
126. See Reagan Order, supra note 14, § 2(a). See also supra notes 110-116 and
accompanying text. This section draws a connection to the Supreme Court support
of constitutionally-based privileges which supercede the limitations placed on the
privilege by legislation like the PRA. See Reagan Order, supra note 14, § 2(a).
127. See Hearings, supra note 3, at 34 (prepared statement of Anna K. Nelson,
Distinguished Adjunct Historian in Residence, American University).
128. See infra Part IV and supra note 8. See generally Stephen L. Hensen, The
President’s Papers Are the People’s Business, THE WASH. POST, Dec. 16, 2001, at B01
(The Bush Order “directly subverts the intent of the [PRA] by placing ultimate
responsibility for decisions regarding access to presidential papers ... with any
sitting president in the future... apparently without limit.”); Robert Dallek, All the
Presidents’ Words Hushed, THE L.A. TIMES, Nov. 25, 2001, at M1 (“the principal
victim of Bush’s directive will be himself and the country”). But cf. Press Briefing
by Ari Fleischer, Office of the Press Secretary, The White House (Nov. 1, 2001),
(“[Presidential records] will be available through a much more orderly process. The
Executive order will lay out the terms of that process, and it will help people to get
information.”).
129. See supra note 8.
130. See Complaint at paras. 4-5, Amer. Historical Ass’n v. Nat’l Archives and
[hereinafter Complaint].

Plaintiff Hugh Davis Graham holds appointments as the Holland N.
nonprofit research organizations\textsuperscript{131} to a non-governmental research institute.\textsuperscript{132}

The Complaint sought declaratory, injunctive and mandamus relief.\textsuperscript{133} The principle claim was that the NARA must administer the PRA without regard to the Bush Order.\textsuperscript{134} The plaintiffs wanted the court to "compel the release of the presidential materials of former President Ronald Reagan that are in the custody of NARA and are being withheld in violation of the PRA."\textsuperscript{135} In their outline of the PRA, the plaintiffs stated that "[a]fter expiration of the 12-year restriction period, formerly restricted materials become available to the public through FOIA to the same extent as materials that were not restricted by the former president."\textsuperscript{136}

Plaintiffs further claimed that once the twelve year restriction period ends, the right to executive privilege is no longer available due to the PRA removal of the FOIA's exemption five.\textsuperscript{137} The Complaint further delineated that "a president may prevent disclosure of records that reflect confidential communications with or among his advisors for no more than 12 years."\textsuperscript{138} After these twelve years pass, the materials should not be withheld and must be released to the public unless they fall under another FOIA exemption.\textsuperscript{139}

The Reagan documents were the first to be made available under the PRA, and over the past twelve years approximately four million pages of documents have been released.\textsuperscript{140} Plaintiffs

estimate in the Complaint that the Reagan records obtained by the NARA are around forty-four million pages of documents. The instant concern is the documents restricted under the PRA by President Reagan. The records total approximately 68,000 pages of documents restricted because President Reagan invoked the "confidential communications" privilege. Historians documenting the Reagan presidency have requested access to these documents.

The NARA provided notice in February 2001, that requests for the 68,000 pages previously restricted by President Reagan would be honored because there was no "substantial question of Executive privilege" within the meaning of the Reagan Order. The NARA intended to distribute the documents on a schedule prescribed by the Archivist to the White House. The White House Counsel sent letters to the Archivist requesting extensions for review of the documents.

President Bush issued the Bush Order in response to these requests, and the Complaint charged that this change in procedure is not in line with the PRA. The Complaint alleged

141. See id. at para. 25.
142. See id. at para. 31.
143. See id.
144. See Complaint, supra note 130, at para. 29 ("Members of plaintiff AHA were among those who requested access to Reagan presidential records, and who did not receive access to restricted records.").
145. See id. at para. 33 (quoting Reagan Order, supra note 14, § 2(a)).
When the Archivist provides notice to the incumbent and former Presidents of his intent to disclose Presidential records pursuant to section 1270.46 of the NARA regulations, the Archivist, utilizing any guidelines provided by the incumbent and former Presidents, shall identify any specific materials, the disclosure of which he believes may raise a substantial question of Executive privilege.
Reagan Order, supra note 14, § 2(a) (emphasis added). Whether or not the materials raise "a substantial question" is left to the sole discretion of the Archivist with the caveat that the incumbent or former President may "invoke Executive privilege with respect to materials not identified by the Archivist." Id.
146. See id. at para. 35.
147. See id. at para. 36.
According to defendant Carlin ... rather than reviewing whether there was a basis for objecting to the release of particular documents that was consistent with the terms of the PRA, the White House was instead "conduct[ing] a thorough legal review of the PRA and consider[ing] its long-term implications on the deliberative process for the Presidency and the Executive Branch."
Id.
148. See id. at paras. 40-41. The Bush Order is "[i]n contrast to the PRA, which makes presidential records available after the 12-year restriction period has ended
that the Bush Order "violates the PRA" on five points.\footnote{Id.}

First, it alleged that the Bush Order makes it possible for materials to be held for an unlimited time, by allowing the incumbent and former Presidents to review the materials.\footnote{Id. at para. 60.} The Complaint charged that this violates "the PRA's commands that records may not be restricted after the 12-year period expires and that the Archivist has an affirmative duty to make them public as soon as possible."\footnote{Id. at para. 60(i).}

Second, the complaint charged that the Bush Order weakens the power of the incumbent President by requiring the incumbent President to concur with the former President about whether to prevent the release of documents even if there is no legal claim for the exercise of privilege.\footnote{Id. (quoting Bush Order, supra note 10, § 4).} The Complaint alleges that the Bush Order requires the incumbent President to concur with the former President "absent 'compelling circumstances,' . . . even if the privilege claim is legally improper or unfounded."\footnote{Id. at para. 60(ii).}

The third claim against the Bush Order was that the Bush Order does not allow the Archivist to release the records until the former President agrees with the release, even if the former President has invoked the privilege and the incumbent President has authorized release.\footnote{Id. at para. 60(iii). In this circumstance the incumbent President would be overruling the invocation of privilege by the former President. However, even when the incumbent President legally overrules the former President, under the Bush Order the Archivist is not authorized to release the documents. See id. (referring to Bush Order, supra note 10, § 6).} The only way to effectuate release is through a binding court order or with the former President's acquiescence.\footnote{Id. at paras. 60(iv-v).} In either instance, the Archivist is unable to act without direction from the incumbent President who makes his decision in response to the former President's actions.\footnote{See Complaint, supra note 130, at para. 60(iii). If Complaint charges that the former President does not take action, the incumbent President does not have to respond to requests by the Archivist and he can delay release by ignoring the information from the Archivist. See id.}

The plaintiff's fourth and fifth claims related to who may invoke the privilege on behalf of a former President.\footnote{See id. at paras. 60(iv-v).} The Bush
Order allows the former President to designate a representative to act on his behalf with regard to the assertion of executive privilege.\textsuperscript{158} Also at issue is the concern as to whether the Vice President should be able to invoke executive privilege "independent of the privilege of the former or incumbent president."\textsuperscript{159} The Bush Order requires the Archivist to, as stated in the Complaint, "accord such a claim [of executive privilege by a Vice President] the same respect as a claim of privilege made by a former president, even though there is no constitutional basis for a vice presidential executive privilege."\textsuperscript{160}

The demands outlined in the Complaint sought the immediate release of all of the requested 68,000 pages of documents, claiming that the Bush Order is unconstitutional.\textsuperscript{161} By refusing the release of the records, the Complaint charged that the NARA violates the PRA and that the Court should mandate release of the documents satisfying the letter and the intent of law.\textsuperscript{162}

\textbf{III. IDENTIFICATION OF THE PROBLEM}

When Representative Stephen Horn convened the House of Representatives Subcommittee that held hearings on the Bush Order, he stated that he "appreciate[s] the need to preserve whatever constitutional privileges may still be appropriate for a former president's records after many years... [h]owever, [he is] concerned that the new procedures [under the Bush Order] may create additional delays and barriers to releasing the Reagan records."\textsuperscript{163} Thus, Representative Horn marked the principal problem with the PRA—the need for excessive executive interpretation for effective implementation.\textsuperscript{164}

Congress enacted the PRA more than twenty years before the Bush Order. The Bush Order relates specifically to FOIA requests under the FOIA for records owned by the federal government because of the PRA.\textsuperscript{165} The PRA attempted to codify practices that were already taking place as former

\end{itemize}
Presidents left office. As a result of Supreme Court precedent that established a constitutionally-based privilege, the PRA could not eliminate presidential privilege with regard to confidential documents after the President leaves office.

The PRA thus created a conflict when the procedure of implementing the Act would determine the breadth and depth of its scope. The inherent problem is that the PRA leaves the Executive Branch with the role of interpreting legislation that deals directly with its own interests.

Like all legislation, the drafters never intended that the PRA would be without need for further interpretation by the Executive Branch at a later time. By leaving several issues unanswered, Congress left room for a balancing-act in the process of implementing the law. However, in this balancing act, Congress left two elements unaddressed. First, the PRA provides no administrative procedures for settling disputes between the Archivist and the incumbent President or former President. Second, there is no process in the PRA to permit the incumbent President to “consider whether privilege ought be asserted to prevent the mandatory withholding of a predecessor’s records.”

IV. ANALYSIS

A. Implementation Under the PRA and Changes Arising from the Bush Order

The PRA does not take away the President’s constitutionally-based privileges, but rather adds to them.

166. See supra Part II.C (including the granting of gift-deeds to the National Archives of President’s private presidential records).
167. See supra notes 113-116 and accompanying text.

The intent of the PRA was never to provide all presidential records to the people, but rather to maintain the records at NARA with the potential for access to them should the former President and the incumbent President authorize the release.\textsuperscript{177}

The Bush Order attempts to fill in gaps left in the PRA.\textsuperscript{178} The concern lies in the implementation of the Bush Order with relation to the speed with which documents are released under the PRA and the FOIA.\textsuperscript{179} Presidential records transferred to NARA and eventually to the Presidential libraries are then released under the FOIA schedule.\textsuperscript{180} The Bush Order has the potential to speed up this process, due to its focus on the specific records that the PRA places in the jurisdiction of the FOIA.\textsuperscript{181} All other claims not covered under the FOIA are exempt from the Bush Order and the Archivist retains the ability to administer the records as he sees fit according to his own regulations.\textsuperscript{182}

The Bush Order may result in speedier release of documents under the PRA.\textsuperscript{183} In order for this to occur, there are two conditions that must be present.\textsuperscript{184} First, there must be a large volume of presidential records that the FOIA would not protect from mandatory disclosure.\textsuperscript{185} Second, the Archivist must be willing to take the initiative to release documents before a request has been made.\textsuperscript{186} In this instance, the Archivist would make the sole decision as to whether materials present some substantial question of privilege.\textsuperscript{187} "In such circumstances, the

Bush [O]rder would not contemplate any review by the incumbent President, and it would appear much easier to achieve the release of presidential records after 12 years."\(^{188}\)

**B. Congruence Between the Bush Order and the Intent of the PRA**

The Complaint filed by historians against the NARA, in response to the implementation of the PRA under the Bush Order, asserts that the order is not in accordance with the PRA and should not be followed.\(^{189}\) However, Congress did not intend the PRA to allow unlimited access to all presidential records.\(^{190}\) Rather, defining the ownership of the documents was the primary element in the PRA legislation.\(^{191}\) Thus, records previously owned by Presidents and then deeded to the government automatically become the property of the federal government under the PRA.\(^{192}\)

Where the historians' Complaint has merit is in its claim that the incumbent President gains some ability to restrict documents under the Bush Order that the FOIA does not grant.\(^{193}\) This ability does not create any new rights. Indeed, the President is merely executing his executive privilege, to which he is entitled regardless of the Bush Order.\(^{194}\) The Bush Order merely codifies the interaction between executive privilege and the PRA.\(^{195}\)

Although Congress may not have intended the PRA to allow for incumbent Presidents to block the release of former Presidents' records indefinitely,\(^{196}\) the Bush Order applies the

PRA in an appropriate manner, considering the powerful right of presidential privilege. The Complaint fails to recognize that the PRA does not give the people a right beyond public ownership of the records. Public access to the records is governed by the FOIA, which remains subject to executive privilege. Furthermore, the PRA allows the judiciary to compel disclosure of specific documents. However, the Complaint requests complete disclosure of documents and nullification of the Bush Order. Such nullification is not necessary to maintain the PRA.

C. Presidential Intent for the Bush Order

Maintaining the constitutionally-based privileges that Congress never intended to remove from former or incumbent Presidents via the PRA was vital to implementation of the Act. Section 2204(c) of the PRA provides that nothing in the Act “shall be construed to confirm, limit, or expand any constitutionally-based privilege which may be available to an incumbent or former President.”

Congress expressly asserted that both the incumbent and former Presidents would maintain their rights to these constitutionally-based privileges to prevent the disclosure of presidential records which might otherwise be released under the PRA. In fact, when testifying before the House

Subcommittee, Acting Assistant Attorney General M. Edward Whelan, III, explained that the Bush Administration saw the Bush Order as a way to make the PRA consistent with these constitutionally-based privileges.\textsuperscript{206}

The desire to maintain the executive privilege to protect confidential communications is central to the Bush Order.\textsuperscript{207} The Supreme Court's protection of such confidential communications is stronger than any statutory mandate for disclosure—either under the FOIA or the PRA.\textsuperscript{208} Where the statute provides liberal access to documents, and the Supreme Court is exceedingly protective of potentially confidential documents, the Bush Order effectively strikes a balance\textsuperscript{209} by adhering both to the PRA and the Supreme Court orders in \textit{Nixon v. Administrator of General Services}\textsuperscript{210} and \textit{United States v. Nixon}.\textsuperscript{211}

"President George W. Bush issued Executive Order No. 13233 to establish neutral procedures for the incumbent and former Presidents to review documents subject to release and invoke constitutionally based privileges."\textsuperscript{212} In contrast, the PRA's vague guidelines were silent as to how presidential privilege and the PRA would interact.\textsuperscript{213} For the first time in its history, the PRA needed to be interpreted, and the Bush Administration, specifically the Office of Legal Counsel, took time to address the Act's concerns while balancing the executive privilege.\textsuperscript{214} Whelan and others in the Bush Administration

drafted the Bush Order as a response to these requests.\footnote{215}

The Bush Order does not purport to give the incumbent President any additional rights.\footnote{216} Rather, the Bush Order specifically mentions that it does not "indicate whether and under what circumstances a former President should assert or waive any privilege."\footnote{217} The Bush Order clarifies the process through which PRA requests are honored.\footnote{218} During the November 1, 2001, Press Briefing by Ari Fleischer,\footnote{219} questions arose regarding the Bush Order and the PRA.\footnote{220} Fleischer's responses to these questions about the Bush Order specified that the Administration intended the Bush Order to increase efficiency in PRA implementation, thereby easing the burden on those requesting documents.\footnote{221} More importantly, Fleischer stated that the Bush Order would begin the process of releasing documents from the Reagan presidential records, which had been stalled until implementation language was drafted.\footnote{222}

The government needed the Bush Order to withhold certain documents that may still contain matters that must be kept confidential.\footnote{223} By placing only a temporal limitation on the release, the Reagan Order failed to address documents that the former President consents to the release of, but which the incumbent President deems confidential.\footnote{224} Fleischer articulated this potential problem in an example:

> There very [well] may be a decision by an administration that has been out of office for 12 years to release certain documents. Those documents could still have national

Whelan, III, Acting Assistant Attorney General, Office of Legal Counsel, Dept. of Justice). Once President Bush took office in January 2001, there were numerous requests for the Reagan Administration documents. \textit{See id. at} 447 (prepared statement of Morton Rosenberg, specialist in American public law, American Law Division, Congressional Research Service). Whelan never specifically states that the requests were coming in, although it is apparent from the filing of the Complaint by the various historical groups that these requests did take place. \textit{See id. at} 20 (statement of M. Edward Whelan, III, Acting Assistant Attorney General, Office of Legal Counsel, Dept. of Justice).

security implications. A previous administration that is not currently in power would not be as aware as a current administration of ongoing national security issues. So that provides for an ability of a current administration to review it.\(^2\)

The Bush Order thus takes the mandates of the PRA and implements them while maintaining the superior, constitutionally-based privileges.\(^2\)

The release of Presidential records is not new to the PRA. Presidents have a history of releasing documents, even those that have previously been considered confidential.\(^2\) The PRA merely attempted to codify the patterns of previous Presidents, and specifically did so in response to the concerns following the Nixon presidency.\(^2\) The Bush Administration offered Executive Order 13,233\(^2\) as a means to make the difficult-to-interpret elements of the PRA\(^2\) fit with the Act's purpose while remaining constitutionally-sound.\(^2\)

After the initial Congressional committee hearings\(^2\) in response to the Bush Order Representative Horn introduced House Bill 4187\(^2\) entitled “Presidential Records Act Amendments of 2002.” Representative Horn held further hearings before the Subcommittee on Government Efficiency, Financial Management, and International Relations to discuss House Bill 4187.\(^2\)

House Bill 4187 includes a requirement that

\(^{225}\) Press Briefing by Ari Fleischer, supra note 128.

\(^{226}\) See id.

\(^{227}\) See Dorsen and Shattuck, supra note 1, at 2 (“Executive privilege has proliferated over the decades very much as executive power itself has grown. Early presidents asserted the privilege infrequently and in narrow circumstances.”).

\(^{228}\) See supra notes 46-52. See generally Dorsen and Shattuck, supra note 1. Although Presidents had previously gifted their papers to the federal government, the PRA codified this practice. Additionally, following the Nixon presidency there was much attention paid to the need for oversight of the Office of the President with regard to potentially incriminating records.

\(^{229}\) See Bush Order, supra note 10.

\(^{230}\) Namely this is a reference to the provisions which relate to the matters discussed supra relating to the release of presidential records after the expiration of the 12 year period following their term.

\(^{231}\) See Hearings, supra note 3, at 480-82 (prepared statement of Todd F. Gaziano, Senior Fellow in Legal Studies and Director, Center for Legal and Judicial Studies at The Heritage Foundation).

\(^{232}\) See generally Hearings, supra note 3.

\(^{234}\) Horn introduced the third, and final, hearings as an opportunity to determine whether House Bill 4187 was the appropriate legislative response to the
"[t]he Archivist shall not make publicly available a Presidential record that is subject to a privilege claim asserted by a former President until the expiration of [a] 20-day period . . . ."235 This requirement effectively proposed to put an unconstitutional limit on the President’s exercise of executive privilege.236 Unlike the Bush Order, which implements the PRA, House Bill 4187 attempts to broaden the reach of the PRA by placing new restrictions on the President requiring an expedited schedule for release of documents by the Archivist.237 Additionally, House Bill 4187 would change the PRA to require that “[u]pon the expiration of such [twenty-day] period the Archivist shall make the record publicly available unless otherwise directed by a court order in an action initiated by the former President.”238 It is unclear why Representative Horn justified placing such a burden on the former President when Congress would be in a

Bush Order.

Our earlier hearings fully explored the problems with Executive Order 13233. Today’s hearing focuses on potential solutions. Specifically, we will consider H.R. 4187, a bill that I and several of my colleagues introduced on April 11, 2002. H.R. 4187 would replace the executive order with a statutory process for former and incumbent Presidents to review records prior to their release and assert executive privilege claims, if they so choose.

235. H.R. 4187 § (c)(1).
236. Todd F. Gaziano, Senior Fellow in Legal Studies and Director of the Center for Legal and Judicial Studies at The Heritage Foundation (a nonpartisan research and educational organization) identifies the constitutional problem with the legislature attempting to place limits on the President’s exercise of executive privilege:

Subsection (c), if it were constitutional, would effectively nullify a former President’s right to assert executive privilege over documents from his administration. It would convert an executive privilege that is presumptively valid and can only be overturned by an affirmative court order into a right to delay the release for twenty days. The President’s opportunity to seek court action does not cure the constitutional defect, because Congress simply has no power to take an exclusive presidential power and condition it on the assent of another branch. That is a basic tenet of separation of powers doctrine. It should be self-evident that a power which flows from the separation of powers (the executive privilege) cannot be conditioned on approval from the courts (subsection (c)).

Hearings, supra note 3, at 482 (prepared statement of Todd F. Gaziano).
237. See id. at 484 ("H.R. 4187 does not amend the framework of the PRA that is within Congress’s power, but it is an attempt to modify, condition, and partially nullify incumbent and former Presidents’ constitutional powers. In these respects, H.R. 4187 would be void even if it were passed.").
238. H.R. 4187 § (c)(2).
better position to afford such expenses.\textsuperscript{239}

V. PROPOSAL

The instant issue is the struggle between the desire for historians to have access to the documents of former Presidents and the need to maintain presidential privilege.\textsuperscript{240} While the interests of historians are important to the development of a national history,\textsuperscript{241} executive privilege supercedes such academic interests.\textsuperscript{242} In order to continue the pattern of liberal release of documents by former Presidents, the PRA needs to have guidelines for its implementation.\textsuperscript{243} The Bush Order effectively sets precedent for the future distribution of presidential records under the PRA.\textsuperscript{244}

The PRA was the result of a Congressional attempt to codify the traditional action of Presidents gifting their records to the People of the United States.\textsuperscript{245} This attempt was bold, and the ownership of these records is now more important than ever as historians seek to learn more about the past.\textsuperscript{246} The PRA falls short, however, in its lack of clarity about the release of the

\textsuperscript{239} See Hearings, supra note 3 at 482 (prepared statement of Todd F. Gaziano, Senior Fellow in Legal Studies and Director, Center for Legal and Judicial Studies at The Heritage Foundation).

Subsection (c) may be predicated on the belief that the former President is in a better position to bear the cost of litigation than the requester. There are four logical responses to this notion. First, it is not true with regard to large media corporations. Second, Congress could subsidize such litigation, but since it failed to do so, it makes more sense for the person who seeks to profit by such information to bear the cost of litigation—regardless of relative wealth. Third, the former President already must devote substantial amounts of time to reviewing burdensome document requests for potentially privileged documents; he should not also have to bear the burden of initiating litigation when a requester might be satisfied with the balance of what is released. Fourth, and most important, a policy concern—no matter how well founded—cannot trump a constitutional right.

\textsuperscript{246} See Complaint, supra note 130.
confidential records of former Presidents.\textsuperscript{247} Perhaps twenty-five years ago, when Congress passed the PRA, it did not foresee the implementation of the Act beyond the question of ownership. However, legislative history suggests otherwise.\textsuperscript{248} As President Reagan left office and issued the Reagan Order, Congress chose not to change the PRA to delineate more specific procedures for the release of documents. Thus, the PRA left open to the political process the determination of how executive privilege would cooperate with the Act, resulting in the release of Presidential records.\textsuperscript{249}

The fact that the Bush and Reagan Orders were able to modify the implementation of the PRA illustrates the weak nature of the Act. It also shows that the Act could not stretch beyond ownership without infringing upon the executive privilege. Therefore, the Act left the responsibility for interpretation of the PRA to the Executive,\textsuperscript{250} and any release of documents constitutes a permissive waiver of executive privilege.\textsuperscript{251} The Bush Order organizes this waiver into a system of requests by the Archivist to the former President and eventually leaves authority with the incumbent President to invoke executive privilege.\textsuperscript{252} The Bush Order thus strengthens the constitutionality of the PRA.\textsuperscript{253}

Implementation of the PRA beyond the definition of who owns presidential documents, still must fall within the privilege requirements that the Supreme Court has established.\textsuperscript{254} The Bush Order does exactly this. Even without the PRA, history

\textsuperscript{247} See Reagan Order, supra note 14; Bush Order, supra note 10.
\textsuperscript{248} See Hearings, supra note 3, at 11-12 (prepared statement of John W. Carlin, Archivist of the United States).
\textsuperscript{249} See id. at 479-81 (prepared statement of Todd F. Gaziano, Senior Fellow in Legal Studies and Director, Center for Legal and Judicial Studies at The Heritage Foundation).
\textsuperscript{250} See id. at 68-71 (prepared statement of Peter M. Shane, professor, University of Pittsburgh and Carnegie Mellon University).
\textsuperscript{251} See id.
\textsuperscript{252} See Bush Order, supra note 10. See also Hearings, supra note 3, at 484 ("Thus, [the Bush Order] contains the President's public statement regarding how he will exercise his constitutional power (and respect the constitutional power of former Presidents) within the framework of the PRA. It also contains his instructions to the Archivist in such matters.").
\textsuperscript{253} See Hearings, supra note 3, at 480 ("The bulk of [the Bush Order] is not only lawful and prudent, but it is—with minor exceptions—practically the only way to implement the PRA consistent with the incumbent and former Presidents' constitutional obligations.").
\textsuperscript{254} See supra Part II.C.1.
proves that the men who have served thus far as President of the United States have opened their presidencies to historians by gifting their records to the People.\textsuperscript{255} Congressional opposition to the Bush Order will not serve the goal of those who profess to be against the order.\textsuperscript{256} Representative Horn, the Congressman who convened the hearings on the Bush Order and introduced House Bill 4187, retired from Congress in January 2003.\textsuperscript{257}

Congress never passed the legislation that would have modified the PRA and invalidated the Bush Order.\textsuperscript{258} The Bush Administration ultimately released most of the documents at the heart of the debate about the PRA,\textsuperscript{259} further proving that in due time presidential documents make their way into the hands of historians. Although it is important for Congress to play a role in the release of presidential records, it is equally important to allow the Executive to implement the PRA. There is nothing

\begin{itemize}
  \item \textsuperscript{255} See supra note 3.
  \item \textsuperscript{256} See supra Part II.D.
  \item \textsuperscript{257} Due to significant changes in the make-up of the Congressional District which he represents, Representative Horn announced his retirement in September 2001:
    
    Just days after a CA Assembly committee released a redistricting plan that would erase LB's 38th Congressional district (moving it to near Fresno), put most of Long Beach in the same Congressional district as Carson and Compton (now led by a Democrat) and split East Long Beach, the man who represented much of LB, Lakewood and southeast L.A. County in the U.S. House of Representatives since 1992 has announced he will leave Congress at the end of his current term.
    
    
    Representative Horn thus knew that he only had one term in which to take action on the Bush Order as he announced his retirement before commencing hearings on the proposed changes to the PRA.
  \item \textsuperscript{258} After the close of the 107th Congress, the legislation pending needs to be reintroduced. With the absence of Representative Horn, the primary sponsor of House Bill 4187 and the bill's author, it is unlikely that the legislation will be introduced again in a future Congress. Furthermore, the release of the Reagan documents makes revision of the PRA, once again, unnecessary as there is no pressing dispute.
\end{itemize}
"simple" about American democracy when it comes to the interplay between the three branches. However, the PRA is a perfect example of how to reach the delicate balance of congressional legislation, Supreme Court rulings, and Executive Orders from the President.

VI. CONCLUSION

The Bush Order is, as its title suggests, a guide for "Further Implementation of the Presidential Records Act."\(^{260}\) The problem, however, is that the PRA did little other than turn over ownership of presidential records to the federal government.\(^{261}\) Due to superceding constitutionally based privileges, the PRA could not mandate release of all documents including confidential communications.\(^{262}\) Even the FOIA provisions could not mandate that action. The Reagan Order, followed by the Bush Order, made the provisions of the PRA operate within the rights afforded the President under executive privilege.\(^{263}\) Dissent with the Bush Order charging that it is in opposition to the PRA, does not pass muster as the Order relies upon constitutional merits rather than the statutorily-based merits of the Act.\(^{264}\)

Although Congress has the option of taking on the challenge of balancing the two important interests of executive privilege and access to historical information, the Bush Order is a strong solution to the problems of the PRA.\(^{265}\) Access to information is a vital part of understanding our past and the role of historians as we embark on the future cannot be ignored. Presidents should be encouraged to be candid with the release of their documents, but further legislation is not the best way to implement that goal. The Bush Order strikes a delicate balance in the need for implementing the PRA and securing history-only the future will test its effectiveness.
